Balancing Life's Budget.

With the problem of balancing budgets occupying the minds of all people entrusted with the duties and responsibilities of government whether in the Federal, Provincial or municipal fields; with the same problem uppermost in the minds of the executives of all our large transportation systems, industrial enterprises and financial institutions; with every business man, big and little, every head of a family on salary or earning wages, even men and women out of employment, all engaged with the same problem, the thought intrudes itself: "Are people, individually and collectively, more concerned with the dollar-and-cents balancing of their material budgets than they are with the much more important balancing of their lives?"

It is important, of course, vitally necessary in fact, that people should balance their material budgets. If they do not, bankruptcy in business and financial disaster lies ahead. No individual, no corporation, no government, no nation, can go on indefinitely spending more money than they receive or have. Monetary budgets must be balanced; trade budgets must be balanced, that is, inasmuch as every import is likewise an export, and every export an import, these must balance—and if every nation insists on developing exports while refusing to receive imports, the world's economic structure is thrown out of balance and bankruptcy leading to disaster and ruin is inevitable.

But it is equally true, and a law of nature that cannot be ignored and dare not be defied without loss and suffering, that the budget of our very lives must be balanced. But inasmuch as disaster may not follow quite so quickly, and the payment of the penalty may be longer deferred, than is true in the financial world, most people neglect to properly balance their lives until it is too late.

In the struggle for material wealth, for success in business, for supremacy in political life, for victory in the field of sport, even to reach the top of the social ladder, what a vast number of people overlook and neglect the all-important asset of maintaining their physical health. Failing to do so, their lives are sadly out of balance, for of what avail is the accomplishment of their desires if the price to be paid is impairment in health, bodily vigor and strength undermined? Achievement at such a price is too costly, and is, in fact, not achievement at all, but failure, because one cannot enjoy or long retain that which has seemingly been achieved.

How frequently has it happened that a brilliant student aiming at high marks and scholastic honors through too close application to his or her studies, and the burning of the midnight oil, has so sapped both mental and physical strength that in the crowning hour of learning achieved, and apparently with a life of great promise just beginning, collapse has come.

Others in the race for material things utterly fail to balance the budget of their lives by any intellectual studies or pursuits. They fail to balance their lives with the beauties of nature, or music, or good literature. They even neglect the taking of proper exercise and recreation. As a result of their unbalanced lives they become gross, self-centred, utterly selfish, and largely lost to all the finer things of life.

Man is a dual personality,—a combination of body and spirit. If his life's budget is to balance, he must devote attention both to his body and its needs and to the development of mind and spirit. He cannot afford to neglect either the one or the other; neglect of one means not only that it will suffer but the other will also suffer.

The balancing of life's budget calls for an all-round development of body and of spirit, and of the mind which is partly of the body and partly of the spirit. A man may scoff at religion, he may profess to have no religion, but in so doing he merely advertises the unbalanced character of his life. He is less than a complete man. A man may be perfect physically, but if he neglects his mind and his spirit, he is merely a high type of animal. On the other hand, one who neglects his body and develops his mental powers to the exclusion of all else, is a freak, and even his mental powers become distorted and unreliable because he lacks the necessary contact with and appreciation of natural human forces.

It is only through a true balancing of life's budget that man can possibly reach his highest destiny of happiness, achievement and usefulness in this world.

The Scott Centenary

Famous Author's Death Will Be Commemorated In September

The twenty-first day of September next will be the centenary of the death of Sir Walter Scott, the novelist who has been called by some the greatest of all Scotsmen. In every English-speaking nation and also in countries of Europe preparations are being made to observe the event and commemorate the great work of the author of "The waverley Novels," which stand out still as masterpieces of romance and history after all these years.

"My wife used to play the piano a lot, but since the children came she doesn't have time."

"Children are a comfort, aren't they?"

Historic Boulder Found

Believed One On Which Christ Stood To Perform Miracle

The boulder upon which Christ stood on the shores of the Sea of Galilee to perform the miracle of the loaves and fishes, as related in the Bible, is believed to have been discovered at Tabgha, near Tiberias, Palestine.

The stone was found in the centre of a fourth cenutry church, recently uncovered, and is believed to have been beneath the altar. The church was one of the many built during the reign of Constantine the Great. Behind the stone was found a mosaic panel depicting in vivid black, red and yellow, a basket, several loaves of bread and two fishes.

Owe Much To Grenfell

It is forty years since Sir Wilfred Grenfell went to the Labrador and set about helping the distressed natives. Now, thanks to him, the coast has five hospitals, seven nursing stations, two schools, co-operative stores, orphanages, trading centres, and children's homes.

Where Licenses Are High

Motor car taxes are high in Germany, the average payment made by German motorists being $150. Great Britain's average is $120, while in America it is as low as $32, which includes also the petrol tax.

Would Train Nurses For Mental Hospital Work

Alberta Psychiatrist Speaks Of Success In Treating Mental Cases

Combined training courses for graduate nurses, which would include as well as general hospital work a considerable amount of mental training was suggested by Dr. N. Barager, Alberta psychiatrist, as one of the solutions to the present mental health problem at the recent session of the Alberta Association of Registered Nurses Convention.

The mental hospital nurse needs general training plus tact and good judgment to the 'nth degree, he declared.

Readjustment of the public viewpoint to the mental case, which is gradually taking place, is one of the greatest needs in dealing with the care of such patients, he said. It must be understood the patient is ill, as is the patient in the general hospital.

Dr. Barager spoke of the 25,000 patients in mental hospitals and 6,000 in mentally defective institutions in Canada. The age-old idea of an insane person entering the hospital and remaining behind closed doors for the remainder of his life is an untrue picture today. Sixty-one per cent. of the number admitted were discharged last year.

The day is not far distant when criminals will be treated as mentally ill persons and dealt with by psychological measures, the doctor believed.

Plenty Of British Capital

Is Available In Canada For Sound Investment Purposes

Millions of dollars of British investment for the development of empire enterprises where fair returns can be shown for bonafide industrial projects, Major Gordon C. Home, official of the Empire Development Association, of London, England, stated at Victoria.

"There is plenty of capital in Great Britain, despite the difficult nature of times, looking for ordinary returns through investments in industrial and other undertakings, within the empire. Our great difficulty has been that worthwhile projects in the British dominions have not been drawn as closely to the attention of the motherland as might be desirable. One purpose of the Empire Development Association is to secure information of investment opportunities to lay before those having the capital to encourage and develop such undertakings," said Major Home.

The Flax Seed Industry

Farmers of Canada Are Giving It Considerable Attention

Flax is a crop which is at present receiving quite a lot of attention by farmers throughout the Dominion. There are two principal uses for the crop, fibre and seed. Varieties giving the best fibre are not so well suited to seed production and, at the present time, the bulk of Canadian production is devoted to flax-seed, which has reached an average of over 3,000,000 bushels annually. Some two and a half million bushel of this volume are used domestically in the manufacture of linseed oil. The varieties which are being specially developed throughout the Dominion at the present time are those which offer greatest value from the standpoint of quality of seed and high percentage of oil content.

Garnet Wheat

Mixture As Much As Seven Per Cent. Allowed In No. 1 Northern

Since 1926 the grain inspection department has permitted as much as seven per cent. of Garnet wheat in No. 1 Northern, James D. Fraser, chief grain inspector, told the House of Commons Committee on Agriculture. That proportion would not affect the grade. In general, however, Garnet had been kept fairly well separated from other varieties.

Mr. Fraser had no opinion to offer as to whether Garnet should or should not be graded separately. In his experience he had never received any complaint against No. 1 Northern on account of Garnet being contained therein.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

Many Licenses Needed

So many licenses are needed nowadays that one Huntingdon man holds ten—for shooting game, selling game, employing men, keeping a dog, carrying a gun, slaughtering horses, driving a car, owning a wireless set, running a car on the road, and piloting a plane.

Copper near the surface of the ground is said to check growth of vegetation. For this reason aeroplanes are being used in Africa to spot likely deposits of copper.

Norway has passed a law prohibiting smoking while driving an automobile.

Bolivia is trying to arouse interest in gold mining.

Gas in the Stomach Is Dangerous

Recommends Daily Use Of Bisurated Magnesia To Overcome Trouble Caused By Acid Indigestion

Gas in the stomach accompanied by a full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a little Bisurated Magnesia and take a teaspoonful or four tablets in water right after eating. This will drive the gas, wind and bloat right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness, gas or pain. Bisurated Magnesia (in powder or tablet form—never in liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Cure For Drug Habit

Treatment Effective If Addict Wants To Be Cured

A treatment which the discoverers believe will cure any drug addict who has no complicating illness and who wants to be cured, was reported to the National Academy of Science, at Washington.

It was placed before the academy's annual meeting by Dr. Wilder D. Bancroft, Dr. R. S. Gutsela and J. E. Rutzler, Jr., of Cornell University.

Bancroft and his co-workers discovered that morphine thickens, or coagulates, the proteins in these cells. This effect persists after the influence of a dose of the drug wears off, causing the craving for another and the gradual formation of the habit.

They found that sodium rhodanate acts as an antidote and thins out the thickened proteins again, doing away with the craving and so ending the habit.

Churchill Development

Preparing Facilities For Both Inward and Outbound Cargoes

Construction of a freight shed for imports coming into western Canada by the Churchill route will be one of the features of work at the Bay port this year. Tenders for the shed will be let very soon, it is expected. Only about 250 men will be employed at Churchill by the Department of Railways and Canals instead of the 750 that were engaged last year. Dredging will be done by one dredge this summer, instead of the two that worked last year. The dredging programme will be completed this summer and will leave the harbor ready for the next twenty years, according to port authorities.

Construction of the extension to the conveyor system is underway now and will be completed about the middle of the summer. Only a small portion remains to be completed on the dock. Efforts are under way to obtain livestock facilities at Churchill for the summer, and equipment for unloading coal from inbound boats.

Cuts Electric Sign Cost

Large Economies Will Be Effected Through New Flashing Device

A new electrical flashing device, by means of which a wave of light is sent along a row of lamps without the need of any costly mechanically moving parts, is expected to effect large economies in railroad signalling systems, moving street signs, traffic lights and in other fields. It was demonstrated for the first time in public by William A. Gleusing of the General Electric Research Laboratories, before the Science Forum of the New York Electrical Society.

It Testifies For Itself—Dr. Thomas' Eclectric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

A Free Show

The fact that C. B. Cochran is putting on "The Miracle" again in London, England, again recalls a good story. Among those who were queueing up for the advance booking on the occasion of its last presentation were a Scot and a Jew. When it came to the Scot's turn he asked for twelve orchestra stalls and paid with a tenpound note, which fact staggered the Jew. "Come along, sir," said the box-office man impatiently to the Jew, how many seats do you want for 'The Miracle'?" "None," he replied. "I've just seen it."

Pollorum is a disease which attacks poultry in much the same manner as typhoid does humans.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a red-letter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvelous." Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Biliousness, Poor Complexion and Indigestion. 25c. & 75c. red pkgs. Ask for Carter's by NAME.

The Workless Millions

Geneva Labor Office Gives Estimate Of World's Unemployed

The world's idle workers are estimated by the Geneva Labor Office at somewhere between 20,000,000 and 25,000,000. With two dependents for every person out of work, this would make the total population affected by unemployment between 60,000,000 and 75,000,000. Taking the larger figure, what proportion would it be of the entire population?

This depends on just what the League of Nations experts mean by the "world army of unemployed." If they have calculated as closely for China and Africa and agricultural India as they have for the United States, Great Britain and Germany, we are dealing with a total world population of 2,000,000,000, of whom those affected by unemployment would be one in twenty-five. But it is much more likely that Geneva's figures touch only the slightest way on Asia, and Africa, with the exception of Japan.

In Europe, the two Americas and other sections where an approximately fair estimate of unemployment is possible, we would have about one-half of the world's population. If we assume that this is where the world's unemployed have been observed, the figures cited above would mean one person in every fifteen affected by unemployment.

Tax Duplication

Premier Brownlee, Of Alberta, Deplores Double Taxation System

Duplication of income taxes by federal and provincial governments was deplored by Premier John E. Brownlee, of Alberta, addressing the annual meeting of the Winnipeg Board of Trade. He said steps should be taken to revise the constitution of Canada to meet modern requirements and eliminate the duplication of taxation.

Appealing for confidence, clear thinking and sanity in the face of economic depression, Mr. Brownlee urged business men to co-operate with governments and farmers in the solution of the west's problems. The most pressing problem was that of agriculture. Some means must be found of enabling the farmer to overcome the burden of debts accumulated in the last two years.

Another problem was markets. Research in this field was needed. There were many untouched markets for western Canadian products. All should be sought out and explored.

The problem of governmental finance was also a serious one, but there could be no thought of inflation or public repudiation of debts. Mr. Brownlee criticized those who pressed for government economy at all costs. Saving in expenditure could only be pressed a certain distance, and after that it resulted in a curtailment of essential service.

Death Toll Among Deer

Strange Malady Plays Havoc With Deer In Northern Saskatchewan

Reports that bear evidence of widespread death toll among the deer of Saskatchewan's northland, have been reaching here. Starvation, or some strange malady which may be a form of "sleeping sickness" is believed the cause of the animals' deaths.

Travellers from the Jack Pine lands of the Big River country tell of "scores" and "hundreds" of deer lying dead in the woods.

A game warden instructed by A. H. Etter, provincial game commissioner, to trace down the reports, tells that on one's day's journey while patrolling south of the Beaver River he came across the bodies of twelve deer. There was no apparent cause of death. The animals looked as if they had just laid down and died.

The lungs and liver of these deer were removed and have been sent to the veterinary pathologist at the University of Saskatchewan, who will examine the organs in an endeavor to determine the cause of death. The report is the first official one to be made, but the belief that the condition is general in the northland, is to be investigated as soon as weather conditions permit travel.

Oldest Official Retiring

Sir Edward Wallington, a member of the Queen's household, first as private secretary and then as treasurer since the accession of King George, is soon to retire from office. He is the oldest official in the royal household and was born in 1854. At one time he was private secretary to a succession of colonial governors, and came to be known as "Better Not" Wallington, due to his skill in heading off undesired visitors.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Name Was Justified

First Guest—"I'm sure I don't know why they call this hotel the Palms do you? I've never seen a palm anywhere near the place."

Second Guest—"You'll see them before you go. It's a pleasant little surprise the whole staff keeps for the guests on the last day of their stay."

China has always been a silver-standard country, since it possesses only a negligible quantity of gold.

London will have an ideal homes show this spring.

A Good Investment

Insurance In Reliable Company Is Better Than Stocks

There are countless thousands who would have been well-to-do financially today if they had invested their money in insurance rather than in stocks before the recent panic. If you invest a certain amount of money in insurance, it does not decrease in value; in fact, some of the plans offered by insurance companies increase the value of your investment year by year.

The writer knows of one instance where a business man bought a large policy about five years ago, and at that time he was considering the advisability of buying a policy five times greater in value. His income was large and he could have easily paid the premiums on the greater amount. But instead of putting his excess earnings into an insurance company, he invested in stocks, and, like thousands of others, lost almost the entire amount during the depression. If he had invested this money in the larger policy he was considering at that time, it would not have been swallowed up in the recent panic.

With thousands of our banks failing, we have yet to hear of the failure of a single insurance company. These huge organizations, with capital extending into hundreds of millions, have weathered the financial storm without a tremor.

Regardless of the manner in which we have misconducted the meaning of life insurance, it is nevertheless a safety factor of incalculable value. For death comes to all of us—there are no exceptions—and if we can leave our loved ones reasonably well protected from hardship and suffering we may consider ourselves well repaid for any sacrifices we may have found it necessary to make.—From Liberty.

English Women Are Increasing In Height

And Average Size Of Gloves and Shoes Is Larger

The rate at which English women are increasing in size and weight is one of the most astounding things that has happened in the history of the human race. In 1908 more than two thousand girls were measured in London. They included all classes—and their average height was found to be five feet three. In 1928 measurements of a similar number of girls revealed that they averaged five feet five inches and were six pounds heavier than twenty years earlier. The average size of women's gloves in 1890 was six and a quarter. Today it is seven, and still growing. Shoes tell the same tale as gloves. Sizes of shoes and stockings for women have increased by one and a half sizes. Even heads are growing larger. The round type of head formerly so common is giving place to the long type. Women's heads are an eighth size larger than twenty years ago and men's average a quarter size larger.

Blood Requires Room To Circulate Properly

Tight Clothing Injures Health and Makes People Cold

All clothing from head to feet should be worn loose. Anything tight on the trunk of the body only interferes with the movements of deep, easy breathing and injures health. Tight clothing is bad also because it interferes with the proper circulation of the blood through the body. Many foolish people suffer from cold feet because they wear boots so tight that blood is simply unable to get into them. The proper way to keep warm is by the blood, not by cotton or leather; and the way to help the blood to do its work is to give it room to flow instead of tightening the veins and stopping its circulation.

Left-Handed Appliances

Minnesota University Uses Them In Effort To Cure Stuttering

If someone invents a left-handed monkey wrench, there will be a ready market for it in the speech clinic at the University of Minnesota, for it would be added to its left-handed collection. This today includes left-handed pencil-sharpeners, left-handed classroom chairs and southpaw knick-knacks.

They are being used in the clinic's efforts to cure stuttering. This, the professor finds, is often the result of a person naturally left-handed being forced to use his right arm.

"She is one of those worm-style motorists."

"What do you mean, worm-style?"

"A worm never gives any signal which way it will turn."

Douglas' Egyptian Liniment is unrivalled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

Work Without Pay

Municipal patriotism seems to be strong in London, England. No fewer than 12,500 voluntary workers assist the London County Council in the management of their schools, hospitals, and mental homes. They are appointed every year in March, but they are not paid for their services.

Use of aluminum paint to replace lead has reduced the gross weight of a ship as much as a hundred tons.

French Are Living Longer

But Statistics Show Life Span Shorter Than Anglo-Saxon

The Frenchman is steadily extending his period of life. According to the vital statistics just published the number of people who died in every 1,000 was 13.6 compared with 17.2 twenty-two years ago. Up to the present very little attention has been paid in France to mortality tables. This has been largely owing to the average person's indifference to life insurance. Provision for the future has been largely a question of saving.

Perhaps the wars which the French have gone through with their consequent upset of all statistics, have had something to do with this attitude. At any rate he has paid very little attention to them and when they are discussed, he dismisses them with a "what will be, will be."

However, now that the tables have informed him that he has a chance to live until he is 52 years 3 months instead of the 48 years allotted to him in 1910, he is more interested. Woman's span of life is given as about 56. But no Frenchwoman admits to that age any more than those of other nationalities.

From the above it can be seen that the Frenchman does not live as long as the Anglo-Saxon. At least that is what French statistics seem to prove.

Today there are in Paris about 16,671 persons over 80 years of age as compared with 13,901 twenty years ago. And in that the women seem to have the best of it. The number given for women is about 12,009 as compared with 9,635 in 1911.

What Price Glory

British War Ace and Medalist Cleans Guns For Living

From time to time one reads of the circumstances of certain returned soldiers, and the reading makes one's blood boil. Down in Los Angeles, California, is a British war ace, Cameron MacKenzie, once hailed for his bravery, holder of the Croix de Guerre with four palms and the Leopold medal, eking out a living in a police station cleaning guns at 2 cents each. He was the last man to be shot down by the famous Baron von Richthofen. . . . What a reward for outstanding service to his country!

The favorite food of the so-called sparrowhawk is the grasshopper.

Greater London is now reported to have 8,203,000 inhabitants.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to Wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusts—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft paper pulp, treated in a scientific way with a high-grade furniture polish; and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and lasting finish to furniture and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most tiresome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of *Wonder Paper* and your 100 recipes for "Left-overs."

Report Submitted On The Milling And Baking Qualities Of Spring Wheat Varieties

A report on the milling and baking qualities of Canadian spring wheat varieties has been submitted to the commons committee on agriculture.

The report was made to the National Research Council by J. G. Malloch, assistant research biologist, University of Alberta; W. F. Geddes, professor of agricultural chemistry, University of Manitoba, and R. J. Larmour, assistant professor of chemistry, University of Saskatchewan.

A co-operative study was made of the milling and baking quality of 25 varieties of spring wheat, now grown in western Canada. Samples were grown in adjacent plots by the Dominion Experimental Farms and Universities in Manitoba, Saskatchewan and Alberta in 1928, 1929 and 1930. Only samples which were sound enough to be placed in the statutory grades by official inspectors were used.

Part of each sample was milled and baked in each of the three co-operating laboratories. Four baking formulas were used. The varieties were classified on the bases of loaf volume, texture, crumb color, general appearance of loaf, absorption and yield of straight flour. These classifications were combined to give classifications for baking quality and milling quality and finally for suitability for export and domestic milling. The last classification is briefly:

1. Varieties which are entirely satisfactory: Reward, Ceres, Marquis, Pioneer, Red Fife, Renfrew, Red Bobs 222 and Supreme.

2. Varieties which are fairly satisfactory: Early Red Fife, Ruby and Early Triumph.

3. Varieties which are unsatisfactory: (a) White wheats: Quality, Axminster and Hard Federation. (b) Varieties differing from Marquis in milling characteristics: Garnet and Kota. (c) Varieties inferior to Marquis in baking characteristics: Garnet, Parker's Selection, Brownhead, Huron, Kitchener, Preston and Marquillo.

4. Varieties which are very unsatisfactory: Early Prolific, Dicklow and Vermillion.

Of Marquis, the report states it is "our standard variety and is satisfactory in all respects."

Dealing with Reward, the report reads:

"Reward has a high weight per bushel and a satisfactory flour yield. It has a very high protein content. The baking qualities are excellent. It gives loaves of large volume with good color, texture, appearance and absorption. Reward has the best milling and baking quality of the varieties tested."

Among the varieties placed in the class unsatisfactory for export or domestic milling in the report, perhaps the most extensively grown is Garnet. The report states:

"Garnet: The test weight and the yield of flour are satisfactory. Garnet differs from Marquis in its tempering properties and cannot be tempered properly when mixed with that variety. For this reason the milling quality of Garnet is classed as fair. The protein content is low. It is satisfactory in absorption and in appearance of the loaves. The other baking characteristics are poor.

"It gives small loaves with poor texture, particularly when baked by the blend-bromate or malt-phosphate formulas. The color of the crumb is decidedly yellow. Garnet cannot be considered a desirable variety.

The report was dated on April 4.

Navigators Fear Fog

Only Danger Which Is Really Alarming To Sea Captain

Fogs are the most dangerous hazards that confront navigators. A sea captain is not greatly alarmed by a heavy gale; he doesn't worry much about a high running sea; he manoeuvres his vessel through treacherous sounds and within perilous passages without more than ordinary caution; but when a thick fog hangs over the water he immediately reduces the speed of his ship and keeps his ears open for the bellow of the foghorn that indicates the proximity of a dangerous shore or a hidden rock.

Japs Issue Warning

A warning to the League of Nations and to Soviet Russia to keep "hands off Manchuria" was issued by General Sadao Araki, Japanese war minister, in a speech to the Kokuhonsha, a patriotic society of Osaka.

"What a silly place to put a washbasin!"—Sondagsnisse-Strix, Stockholm.

Fowl Of Canadian Origin

Chantecler Produced In Quebec and Is Hardy Type

There is one variety of fowl that has the distinction of being Canadian in origin. It is the Chantecler which was originated by scientific cross-breeding under the direction of Rev. M. Wilfrid, professor of poultry husbandry at the Oka Institute at La Frappe, Quebec. Rev. Wilfrid's experiments resulted in the production of a breed which had qualities sufficiently distinctive to merit recognition in the year 1918, ten years after the first crossings were made. The breeds from which the Chantecler is evolved are Cornish, Leghorn, Rhode Island, Wyandotte and White Plymouth Rock.

One purpose, which actuated the originator of the Chantecler, was the production of a bird that would be unusally hardy in order to withstand the rigors of the Canadian winter. It was to be both a layer and a good table bird. The comb of the Chantecler has been reduced almost to vanishing point, the purpose of this being to obviate the tendecy of large combs to become frozen in winter. The very small comb is called a pea comb.

Need More Canadianism

Dominion Could Organize As Good Broadcasting As the United States

Canadians are almost persuaded against their better judgment that it is better for us to be under the authority of the United States in this matter than under our own Canadian organization. We are pleaded with not even to try the plan of Canadian organization. We are advised to continue to listen to the Star Spangled Banner and its bearers flapping in the breeze and telling us all about the land of the free and the home of the brave. And a great many Canadians no doubt think this is all right. What is needed is a little Canadianism, just enough to decide that we shall have Canadian representation at Madrid when the allocation of sound waves is decided and just enough to stand up and say that we think we can organize as good broadcasting as New York or Chicago, and with a little more of the Maple Leaf in it than of the American Eagle.—Hamilton Herald.

Not Easy To Answer

How Can Farmer Make Money With Prices So Low

We can tell the farmer to a decimal point how many acres of sod or stubble a man should plow in a ten-hour day with a team of horses or with a tractor. We can inform him that he should be able to grow potatoes for 30 cents per bushel; likewise that the average length of life of a corn-borer is 20.6 years, and that a gang-plow should live to the fine old age of 19.3 years. Yes, sir, we can fairly spout statistics and figures which would amaze the man on the farm. But honestly, brother, when you ask how to make money selling milk to the factory at something under two cents per quart, and when you yearn for enlightenment on how to wax fat on selling pigs with their boots on at $4.25 per hundred, we must follow our usual policy of being very frank, and our answer is that we have a sneaking suspicion that you can't do it. —Stratford Beacon-Herald.

The Stupid Fifties

Columbia Professor Thinks Middle Aged People No Longer Useful

In a book called "Introduction to the History of Human Stupidity," written by a Columbia professor, we are told that economic stability will never return until every person more than 50 years old is retired. This professor says that men over 50 are stupid. And he proved it by writing this book; for he himself happens to be 58 years old.

Those of us who are over 50 and still in harness need not be distressed by what the professor says. Just imagine a world without King George, Premier R. B. Bennett, Mackenzie King, President Hoover, Von Hindenburg, Ramsay MacDonald, Mr. Baldwin, Henry Ford, Premier Henry, Premier Taschereau, and a host of others.

Despite occasional exceptions, youth is impetuous and the ripe judgment necessary to important decisions comes only with the years.

A Really New Invention

Quebec Man Has Potato Machine That Works Successfully

The completion of a potato digging machine of his own invention has recently been announced by Joseph Morau, of Ville St. Pierre near Montreal. He claims that it has been inspected by the federal and provincial government authorities and pronounced to be the only machine in existence today that will dig potatoes without injuring the vegetable. It weighs 300 lbs. is made up of twenty component parts and can be hauled by a team of horses or by a motor truck.

A Unique Opportunity

Canada Has Chance To Do World a Great Service

This country has a chance to become the benefactor of the whole world if the suggestion made in Ottawa the other day by Senator McRae is acted upon. We have in this country deposits of pitchblende richer in radium than anywhere else in the world, and Senator McRae very rightly argues that we should nationalize these fields and exploit the enormously beneficial radium which we can extract from them for the benefit of the multitudes of suffering people all over the world.

It is to be hoped that we are not all too much preoccupied with present troubles to let this splendid opportunity for world service slip by. If nothing is done to follow up the Senator's suggestion it is inevitable that these pitchblende fields will fall into private control and the radium taken from them used to make fortunes for its owners, sufferers from those terrible diseases which radium does so much to check or cure paying for it in the long run. It is said that radium can be made from the Canadian pitchblende at one-seventh to one-fourteenth the cost of that made abroad, so rich is the native ore in the wonderful stuff.

With more than two hundred thousand people dying every year from cancer in the United States, Great Britain and Canada alone, and with —as reported—16 to 20 per cent. of cancer cases cured by the radium treatment, Canada's opportunity for a great world service is unique. We could quickly become the source of the world supply of radium at a price so low that the smaller institutions all over the world could have their own supply and treat multitudes of sufferers whom poverty or other causes now debars from seeking the remedy, and so condemns to death. It is a great opportunity. Surely we shall not let it slip.—Montreal Star.

A Matter Of Conjecture

Scientists Cannot Determine Actual Age Of the Earth

There seems to be an eternal and continuous struggle among scientists to figure out the age of the earth. A report of the Smithsonian Institute gives as its opinion that the universe is three billion years old, which would seem to establish a record that not only exceeds all previous guesses hazarded along this line, but which, moreover, sets a standard for future jugglers with figures to shoot at as they attempt to outdo their predecessors.

It is not quite clear to most people why it is so necessary to determine the age of the earth. Here and there new evidences are uncovered by expeditions which have been excavating tombs and ancient ruins for the purpose of studying antiquity. But even the most interesting discoveries do not take the present age back more than a few thousand years at best, and whatever took place before that period perforce must be largely a matter of conjecture.—St. Catherine Standard.

Deadly Carbon Monoxide

Man In Eastern Province Thinks He Has Method For Eliminating Danger

Jacques Gosselin of Quebec Provincial Department of Labor, believes that he has discovered a process of eliminating carbon monoxide produced by gasoline motors. About five years ago Mr. Gosselin almost died from the deadly fumes, and ever since that time he has been working on his invention.

The inventor claims that his device, an electrical apparatus which can be placed on any gasoline motor, has worked efficiently on several occasions when he locked himself in his garage with the motor of his car running. He emerged from the experiment each time without the slightest trace of sickness.

The nightmare crab of Japan has such long claws that its stretch may be eleven feet.

Fashion

By Annette

THE LIGHT TOPPED BODICE PARIS HAS MADE SO MODISH

And what a remarkably chic effect! All you've to do is to decide whether you want this darling dress for sports or afternoons and then select your fabric.

The sheer woollens create a very soft appearance. And many smart women wear these interesting new woollens that assume new formality from morning until dinner.

Rough crepe silk is another delightfully lovely fabric that while sportive may be worn for afternoons.

A new winter printed crepe silk in combination with plain flat crepe, is charming for this model.

The raglan shoulders are very slimming and very easily handled by the home seamstress.

Style No. 983 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 yards of 39-inch material with ⅞ yard of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Watermark On Paper

Pulp Is Passed Under Roller Which Bears Requisite Device

A watermark is a device which is incorporated in the body of a paper. When paper is made by machinery the paper pulp is passed under a wire roller, known as the "dandy" roll, which bears the requisite watermark device. The paper is thus thinned where the wires of the "dandy" roll touch it, and so, when the paper is finished, these parts are more transparent than the rest. While a large number of postage stamps are printed on watermarked paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

Plants Think On Seeing the Light

Scientist Says Vegetable Kingdom Has Brains and Uses Them

When you see a plant bending toward the light, it is thinking.

For plants have brains, according to experiments conducted by the Smithsonian Institution at Washington. Like human beings and animals, they also have eyes and legs—and use them.

This relation between the vegetable and animal kingdom, discovery of which may have far reaching results, was disclosed by a doctor who has made a study of the actions of plants when exposed to light.

"There appears to exist in the plant a more or less localized region capable of receiving a stimulus," he said. "It has been shown that the most sensitive portion of a coleoptile—the leaf sheet surrounding the bud of an ascending shoot—is the first fifty microns of the tip. The first millimeter is 160 times as sensitive as the second, and 1,800 times as sensitive as the third millimeter zone."

The tip of the plant corresponds to an eye. When light strikes the "eye," then the stem of the plant corresponding to the leg, bends much as a human being does in walking.

Northern Grown Seed

Herman Trelle Advises Use To Avoid Danger From Rust

Prairie farmers who face the annual menace of rust should fight by use of northern grown seed grain, declared Herman Trelle, wheat king, at Edmonton.

Reports on Peace River seed used on the southern prairie affected zones had showp practical immunity the first year, while resistance began to break down the second year. That indicates change of seed every third year would prove good insurance against rust. He believed seed grown in northern Saskatchewan would be equally as effective for Manitoba and southern prairie farmers.

Trelle dubbed the research hunt for good milling rust-resistance wheat varieties as a "wild goose chase" and waste of time and money.

Blind Builder Dead

Man Who Lost Sight At Fifty Built House Without Help

Francis A. Burdett, known internationally as "the blind builder," is dead at Wayne, N.J., at the age of 68, in the home he built with his own hands after becoming totally blind.

He was stricken with blindness at the age of 50. He began his two and a half storey house on the Newark-Pompton turnpike when he was 57, and, refusing to be daunted by his disability, did all of the work himself. Thousands have stopped there each year since its completion to marvel at the accurate craftsmanship of a sightless man.

Cling To Old Idea

North Carolina Indians Still Believe In "Witch Children"

"Witch children," specially educated from babyhood to be witches, have just been reported by a scientist to exist among the Cherokee Indians of North Carolina.

These 20th century witches are "made, not born," says Dr. Frans M. Olbrechts, Belgian ethnologist, in a report issued by the Smithsonian Institute. Children, preferably twins, selected for a career as witches are put through an initiation supposed to endow them with supernatural powers.

A Helpful Remark

"What's happened, George?" she asked her husband, who has got out of the car to investigate.

"Puncture," he said, briefly.

"You ought to have been on the lookout for this," was the helpful remark. "You remember the guide warned you there was a fork in the road."

Though the yield of herring inshore is high, the best fish are caught farther out to sea.

Inglorious End of Glorious Flight

Workmen are shown hauling the wreckage of the plane in which J. A. Mollison (inset), English aviator, made a record-breaking flight from England to Africa, from the Minerton Beach, Cape Town, South Africa. The airman crashed on the completion of his long flight while attempting to make a landing on the beach. He flew from London, England, to the tip of Africa in just five days. Mollison was uninjured in the crash and immediately drove to the aerodrome, where thousands of anxious spectators greeted him.

Probable Carry-Over Of Wheat Is Expected To Be Smallest Since 1928, According To Estimates

A survey of the world wheat situation shows varying conditions, but the bright spot for Canada is the estimate of a comparatively small carry-over, with indications of favorable export trade for the balance of the present crop year, ending July 31, 1932.

Recent estimates place the probable carry-over at 104,000,000 bushels, the smallest since 1928, and about 30,000,000 bushels less than on July 31, 1931.

In a review of world conditions, issued by the Dominion Bureau of Statistics, the European market is described as "broader today than at any time during the present crop year." World import requirements for the balance of the crop year are placed at from 225,000,000 to 235,000,000 bushels. Under present conditions, Canada and the United States will be called on to supply 150,000,000 bushels, probably, says the bureau review, about 75,000,000 from each country.

Reports of below normal conditions in the winter wheat belt of the United States have focused the eyes of the grain trade on the situation there. With early reports of a crop 42 per cent. below the 1931 yield, weather conditions over that production area in the next few weeks will have an important effect upon the world situation.

Growing crops in Europe are subject of varying reports, but it is too early, adds the review, to offer definite comments. In general, crops in northern Europe are inclined to be backward, and in central Europe, including France, Spain and Germany, are in good condition. The Danubian countries report favorable development, with the exception of Hungary, where wheat and rye crops are unsatisfactory. Reports from Russia continue to indicate difficulty in getting the 1932 production underway and the Soviet continues to offer a field for speculation among students of the wheat situation.

Served In World War

Famous Horse Honored At Party On Twenty-First Birthday

"Warrior," the horse who carried Major-General J. E. B. Seeley, former Commander of the Canadian Cavalry Brigade, all through the Great War, celebrated his 21st birthday with a party recently. His two companions in the Seeley stable were invited, while Major-General Seeley and his family drank to the health of the charger.

"Warrior" went into the war as a three-year-old, was never off the Western Front "for the duration," and was never seriously hurt. "Even when a shell burst within a few feet of him," says General Seeley, "I have seen him stand without a tremor, just turn his head and look at the smoke.

"He took to accompanying me on my visits to the Front Line without saddle or bridle when I was riding one of my other horses. During March, 1918, I found myself on "Warrior" directing rear-guard actions. I stabled him in the drawing-room of a little French villa with a parquet floor, and remember very well giving him his corn on a little ormolu table.

"There was a roar close over our heads and a shell hit the villa right in the middle. I said, 'I'm afraid poor old "Warrior" is done at last,' and ran forward to the smoking ruin. But I heard a whinny, and poking his head out of the bricks was "Warrior," crouching down with a joist resting on the middle of his back."

Suggests Two Alternatives

Major Strange Opposed To Separate Grading Of Garnet Wheat

Two alternatives of dealing with Garnet wheat without separate grading were offered to the House Committee on Agriculture by Major H. V. L. Strange, former wheat king and present director of the research department of the Searle Grain Company. The first suggestion was to de-grade Garnet one grade per year until it was eliminated, and the second to let the matter right itself, which he believed it was doing, by the substitution of Reward wheat and its improved varieties. Of the two alternatives Major Strange favored the latter.

Major Strange declared he was definitely against separate grading because he believed it would prejudice the high reputation Canadian wheat now held abroad and bring a lower price.

If Garnet had been graded separately, Major Strange expressed the opinion that Alberta and Saskatchewan wheat growers would have lost large amounts on their crops this year. The two provinces grew an estimated total of 29 per cent. Garnet, or about 89,000,000 bushels. Based on a total of only 60,000,000 bushels of Garnet, Major Strange figured that if it had been graded separately it would have meant a decrease of $4,000,000 in the money taken by the farmers this year.

Work Under Handicap

Watch Is Not Used By Russian Railway Men

The lack of watches in Soviet pockets is partially blamed by the Transport Union for recent railway disasters, says a message from Moscow. Wrecks occur, trains are late, and the transportation system suffers from lack of co-ordination, when employees cannot determine whether they are operating their trains according to the time-table. The Commissariat of Transport, tried the experiment of issuing watches to men as they went on duty, and having them turned in at the close of work, so they would be available for the next shift. This proved unsatisfactory, chiefly because the watches were not given sufficient care. Now the Union has called on the Commissarant of Supply to speed up the output of watches so that all railway men may have them.

Undue Pessimism

Canada Suffering From a National Headache, Says Hon. R. J. Manion

"We are suffering from a national headache induced by a financial debauch," said Hon. R. J. Manion, Federal Minister of Railways and Canals, in the course of an address before the Toronto Liberal-Conservative Businessmen's Club at Toronto.

"There is undue pessimism, just as there was undue optimism in the boom days of 1929," he said. "Let us practice some of the spirit showing during the war, and we will be one of the first countries to return to prosperity."

Good Reason For Economy

A bond salesman went into a drug store the other day and ordered a plate of crackers and a glass of water. A friend who happened to be in the same store, asked him: "What's the matter, Mac? On a diet?"

"No," snapped the other. "On commission."

Dentists Require More Than Mechanical Skill

Students Now Get Good Grounding In Medical Science

No profession offers better possibilities in the province of Quebec than the dental profession, Dr. Walsh, acting dean of the Dental Faculty of McGill University, told members of the Gyro Club at Montreal. There was only one dentist for every 3,300 persons he pointed out.

Up to the present time, Dr. Walsh thought, the dental profession had been looked upon as merely a highly-skilled mechanical one. All this was changing, however, and it was generally recognized now that students of dentistry were getting every bit as good as the medical students. He prophesied that the time was close at hand when people would not merely ask the dentist what was wrong with this or that tooth, but ply him with the question: "Is anything wrong with my mouth?"

Wheat Bonus

Farm Bonus On An Acreage Basis Urged Instead Of Bushel Basis

Payment of a farm bonus on an acreage basis instead of on a bushel basis is favored by the Manitoba legislature. In a resolution, the House urges the Dominion Government, if it continues payment of a bonus, to base it on total acreage seeded. The present bonus is five cents per bushel on wheat produced.

Federal action is called for in another resolution which asks an investigation of the price of farm implements and parts in western Canada by a committee of the House of Commons. Supporters of the resolution said the price of implements had not come down to the extent the price of farm products had and tended to retard economic recovery on the prairies.

Russia Not So Smart

Soap worth 10 cents is now selling at $2.50 a bar in Russia, and we can recall that not many months ago Russia was dumping soap on to British market at prices lower than the cost of production in Britain in an effort to ruin a British industry. Russia is not nearly as smart as she figures she was going to be.

A special study of wood-preserving is to be made in Spain.

Ireland has a badminton craze.

"I came here because I am a bachelor and love war."

"I came here because I am married and love peace."—Buen Humor, Madrid.

For all your cleaning and pressing see Rainbow Cleaners.

Suyoshi Inukai, premier of Japan, was assassinated on Monday.

Rev. R. B. Layton will be absent the week of May 23rd-28th attending the Conference in Edmonton.

Get in on our Anniversary Draw, you might win a prize. Rainbow Cleaners.

The I.O.D.E. suggests that the businessmen of Lacombe should celebrate Empire Day by displays of British made goods, in their show windows and throughout their stores.

Hog and Sheep Fence at Morrison and Johnston, Ltd.

Frederick J. Pilkington, city clerk of Yorkton, was arrested here Wednesday and charged on 25 counts of theft of funds. Pilkington was a chartered accountant, and a member of the board of examiners of University of Saskatchewan. He was short $17,536. —Yorkton Enterprise

The Manitoba Government is said to be in favor of placing a telephone in every farmer's home. They should inquire into the financial result of a similar experiment in Alberta.

The Earl of Egmont, for many years a farmer in the Priddis district, died at his home in England on Monday from the effects of an automobile crash.

Miss Alice Inskip returned from England last week, to join her brother, A. T. Inskip, of the Adelphi Hotel.

WANTED

Furniture of all kinds to sell on commission; good demand for ranges and beds Immediately. Apply Rainbow Cleaners.

Mr. and Mrs. W. L. Elliott and Miss Pye, arrived from Victoria on Tuesday and will holiday for the summer at Gull Lake.

There will be an Ice Cream Social and Dance at the Spruceville Hall, on the evening of May 24th, (next Tuesday). Morton's Orchestra.

GOLF NOTES

The hostesses for the tea to be held on Friday, May 20th, will be Mrs. Parker, Mrs. English and Mrs. Belcher.

All golfers are asked to hand in their scores, less handicaps to the tournament committee (Mrs. Teare and Mrs. Moore) as soon as possible.

It is expected that on Sunday, May 29th, Rev. G. U. Kerby will preach in St. Andrew's Church and all are invited to hear him.

For Sale—Metal doll buggy; like new; height of handle 20 in.; inside 16 in.; adjustable hood. Price $3.00. Mrs. C. E. Todd.

Alexandra Chapter No. 4, O.E.S. is holding its Annual Tea and Sale of Baking, at the home of Mrs. Russel Ramsay, Barnett Ave., for the Benefit of the Junior Red Cross. May 28th from 3 to 6. M19-2c

Rev. H. D. Riggs, Blackfalds United Church, has just completed the printing of a Home Cook Book, compiled by the ladies of his congregation. The book is full of splendid recipes for baking of all kinds and should prove of great value to housewives. Mr. Riggs printed the book himself, and it is a most creditable achievement. It is expected that the sale of the book will net the ladies a neat surplus.

CARD OF THANKS

Mr. J. T. Finlayson, Margaret Finlayson and Mrs. P. McDonald wish to thank all the kind friends who have in many helpful ways assisted them during the recent illness of Mrs. Finlayson, also to express appreciation of the beautiful flowers.

A milestone in the history of Sylvan Lake was passed Tuesday night when the council, after being interviewed by Messrs. Planche and Hanson of the Calgary Power and Light Company, voted to give the company a contract franchise for ten years for light and power, and gave first and second readings to a bylaw to that effect.

Golf Balls 3 for $1.00 at Morrison and Johnston, Ltd.

Mr. and Mrs. Neil I. McDermid, of Calgary, motored here to attend Convocation exercises Friday when their son, Mr. Douglas McDermid will receive his degree in Arts. Mr. and Mrs. McDermid will be Mr. and Mrs. Alfred Chard's guests. —Edmonton Journal

Mrs. Hayden, wife of Mr. C. A. Hayden, managing-editor of the Calgary Daily Herald, died yesterday, following a heart attack. We extend to Mr. Hayden our sincere sympathy.

Remember the baseball game at Blackfalds at 6.30, May 24th. Lacombe vs. Blackfalds. Dance after the game.

FAIRVIEW NEWS

The nice home of Mr. Edward McMullen was destroyed by fire on Tuesday last, also all of the nice furniture, only a few things being saved. We all extend our sympathy to them in their big loss.

Mr. and Mrs. A. W. Sharp have returned home after spending a few weeks with their son at Maple Creek.

An afternoon tea was held at the home of Mrs. Ogilvie on Thursday afternoon quite a number were present.

Miss Barbara Chessor spent the week end with Miss Ila Flewelling.

All roads will lead to Fairview Church on Friday, May 20 to see the play entitled, "Problems of the Ladies Aid.

The many friends of Mr. A. Ogilvie will be sorry to hear of his death. The funeral was held on Saturday and was largely attended.

Mrs. Everett Kent is spending a few weeks as the guest of Mrs. Jeffries.

PRESBYTERIAL PICNIC

Final arrangements for a Presbyterial picnic to be held on June 15th at Meridian Beach were made at the meeting of the W.M.S. held at the home of Mrs. A. R. McFadden, on Tuesday afternoon. All Auxiliaries and Associate Societies are invited to attend and bring a basket lunch. It is planned to hold a Presbyterial Executive meeting the same day at 4.00 o'clock.

Devotional exercises were taken by Mrs. Todd and Temperance questionaire led by Mrs. Misener, brought out the Bible's instructions on the question of strong drink and showed that two hundred million dollars had been spent on this item in 1931 in Canada. The Study leaflet on "The Ministry of Prayer" was read by several members, pointing out the value of a daily period of prayer to one's mental, physical and spiritual life. The June meeting is to be held at the home of Mrs. H. E. Carruthers.

Supply allocation for two quilts; three dark print aprons and used clothing for six boys 9 to 10 years, was accepted, this to be sent to the Bonnyville school home.

SUCCESSFUL PIANO RECITAL

One of the most pleasing and popular annual events in Lacombe is the "Piano Recital" given every Spring by the pupils of Mrs. F. H. Reed. Every year some outstanding musicians have been brought in from Edmonton or Calgary to assist the pupils in the programme. This year Mrs. Reed brought in the "Edmonton String Quartette" consisting of Percy Humphrey, first violin; Frank Skinner, second violin; Bernard Young, viola and Howard Hodgson, 'cello. A string quartette was somewhat of an innovation in Lacombe, and their two numbers and two encheres were received with the greatest enthusiasm.

The piano programme was this year given by twenty-two pupils graded from little Margaret DeLong to Miss Helen Barbour, A.T.C.M. One of the most interesting features of these annual recitals is watching the steady, and in most pupils rapid development year by year from tiny tots playing their first numbers in public, to finished musicians like Miss Thelma Radd and Miss Barbour. Mrs. Reed has developed several pupils from almost their first lessons to finals in the Royal Academy of Music, London, England, and at the Toronto Conservatory of Music. Two of Mrs. Reed's pupils have taken their L.A.B., Licentiate Associated Board, and one her A.T.C.M., Associate Toronto Conservatory of Music, and this year Miss Radd is taking her A.T.C.M., and Miss Barbour her L.A.B. While the majority of pupils will not go on to the taking of the degree work, Mrs. Reed has the ability to instil into all of her pupils a genuine love for music, and every one of her pupils who has taken lessons for two years or more has received an insight into music which will be a life-long pleasure.

In this age when such a wide range of the very best music is available from records and over the radio the question is often asked, is it worth while to take music lessons unless one has real musical talent? This is all the more reason why it is worth while to take lessons. At every lesson Mrs. Reed explains some of the principles of musical construction, illustrates the different types of music, points out some of the special features of the composition which the pupil is studying, or some special talent of the composer. Gradually this leads to a knowledge of the great composers and their compositions and in a few years the pupil has absorbed a knowledge of music and a love for and appreciation of good music which will increase by many fold the pleasure of hearing music, whether at a concert, from records, or over the radio.

It must be a source of joy and even pride to many parents to watch their children advancing year by year in ability to play at these recitals. At this year's recital every pupil played so well that it is difficult to mention any special pupils, but the writer was particularly impressed in Mary Moore, Patsy Hay and Donald McCormick. In a year they seem to have developed from child players to young artists who played with authority and distinction.

This is written by a lover of music to whom it has been a life-long regret that he did not realize and make use of his opportunity as a child to receive a musical training which would have vastly increased his appreciation of and joy in music.

BALANCED

Smoothness and Economy!

. . . the reason why
"It's wise to choose this Six"

ONCE you really study the Chevrolet Six, you'll know immediately why so many motorists are saying "It's wiser than ever to choose this Six". Study the engine, for example. Long ago Chevrolet pioneered the six-cylinder engine in the low price field because this type of power plant *strikes a perfect balance of smooth performance and maximum economy.* It is a fact that the Chevrolet Six costs less for gasoline, oil and upkeep than any other full-size car! In addition, the Chevrolet Six gives you *more actual horsepower* in the normal driving range—balanced power, for quick acceleration and effortless speed. And this six-cylinder engine has been proved reliable by more than 2,000,000 owners in billions of miles of driving.

Ask your friends about the Chevrolet Six; come to our showrooms and drive it. Remember, you can have immediate delivery of any Chevrolet model—at new, reduced prices—and on easy monthly payment terms.

OBITUARY

Another old timer in the person of A. W. Ogilvie passed away at his home near Ponoka on Thursday, May 12th, after some years of failing health which terminated after a few weeks illness.

Deceased was born in Musquodoboit, N.S., in June 1860, where he passed his earlier years. At the age of twenty-four he was united in marriage to Kate Stuart Dares, also of Musquodoboit. Thirty -four years ago they came to Alberta and took up a homestead eight miles north of Lacombe. Some years later they moved to their present home.

The sons of Mr. and Mrs. Ogilvie are Ruggles, Hollis, Arthur, Aubrey all settled near home and William the youngest at home. Another son, Murray died in 1906. The daughters are: Mrs. Powell, of Calgary; Mrs. Lynch of Medford, Oregon; Mrs. Pearson and Mrs. Dool, near home.

He is survived by eighteen grandchildren, also a brother Ezekiel, of Lacombe and David Rove of Svensen, Oregon.

In the passing of Mr. Ogilvie, his dear ones lose a devoted husband and father, and the community a generous-hearted, whole- souled friend, one who was always interested in their welfare and a loyal citizen who took a great share in making this Alberta of ours a better place in which to live. He will be greatly missed by a large number of friends and acquaintances.

Interment took place in Lacombe Cemetery on Saturday, May 14th.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: Rev. T. H. Chapman
Organist: Miss Kathleen C. Walters, L.A.B.

May 22nd—Community Sunday
10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.

July 4—9. The Sixth Annual Diocesan Summer School will be held at Banff. If you would like to spend a wonderful, but inexpensive week in this world-famous resort, returning greatly refreshed both in mind and body; then see to it that you Register with as little delay as possible, which will help to ensure your participation in a limited number of Bursaries of the value of $4.00 each, paying almost one-half of the total cost of the School, thus giving you a whole week in Banff for some FOUR or FIVE Dollars. And, O, Boys! The meals that the ladies of St. John's Church, Calgary, serve, are someting to write home about. Oodles of real Honest to Goodness Strawberry Short-Cake! Yum! Yum! Can't You Almost Taste It?

If only just a little bit interested, please see the Rector and he will very gladly supply full information, together with Registration Blanks.

WHERE THE MONEY WENT

The architecture firm of J. S. Archibald, in Montreal, received in excess of $1,000,000 for services in connection with Canadian National Railway hotel construction since 1927 the house committee on railways and shipping was told last week. Why not to a Canadian

A total of $372,800 has been paid since 1923 to G. A. Gaston, a U.S. Auditor by the Canadian National Railways to straighten out it financial structure. Sir Henry Thornton, president, told the house of commons railways and shipping committee here today.

Is it not about time Sir Henry Thornton made his exit

LINDBERGH BABY MURDERED

Hopewell, N. J., May 11—The Lindbergh baby is dead; murdered brutally.

They found the body—it was hardly more than a skeleton—late yesterday afternoon. A negro truckman, pushing his way through thick brush of the Sourlands—not five miles from the Charles A. Lindberg estate—made the discovery.

Police were called. Identification was confirmed. A baby hunt, cautious and painstaking, was ended; a man-hunt, wide-flung and intense, swept forward in its place.

Discovery of the child's skeleton was made by William Allen, negro truckman. His truck, driving along the Hopewell-Mount Rose highway, had failed, and Allen had left it to enter the woods.

Brush and undergrowth blocked his path. He stopped and pushed it aside.

Beneath the brush, underneath a layer of rotting leaves lay the body of Charles Augustus Linbergh Jr., only child of Anne, daughter of the late Senator Dwight W. Morrow, and Charles Lindbergh.

Clinging to the decomposed body was weather-worn flannel that had kept the body warm that night of March 1, when his nurse tucked him into his crib. These shreds of baby clothing were identification enough: these and the matted, curly blond hair.

Today, a horror-kindled incentive drives forces of the law to unrestrained hunt for the murderer, the leases of secrecy and of fear for the baby's safety no longer held. It was no longer necessary to exercise extreme care. Murder had been done.

A compond fracture of the skull caused death. The murder evidently was done very soon after the kidnapping, probably within an hour. A mad man apparently, muscled either by an intense hatred or an overpowering fear, struck the child dead. Physicians described it as a "terrific" blow.

No weapon has been found.

State police of New Jersey, who have been in direct charge of the search for the baby since the night, 73 days ago, when the voice of Col. Lindbergh over a telephone said, "My baby has been kidnapped," made the identification of the body. A physician added confirmation.

Later Miss Betty Gow, the baby's nurse, said she was "quite certain" the body was that of the Lindbergh child.

AT BLAIRMORE

Police are investigating the burning of a fiery cross at Blairmore last week. They will possibly discover that it was just a case of someone burning rubbish from the Spring yard cleaning. If grass and leaves and odd pieces of paper are rolled up in wire and formed into a cross, this method makes a more attractive mode of burning rubbish.

BENTLEY NEWS

Born: at the Bentley Hospital, on Sunday, May 15th, to Dr. and Mrs. Wm. A. Henry, a daughter.

Born: at the Bentley Hospital, on May 13th, to Mr. and Mrs. Kunninum of Sylvan Lake, a son.

Mr. and Mrs. Bert Thorpe are visitors in Edmonton this week.

Mrs. Chas. McDougal returned from a trip on Sunday.

Mrs. Kirkham has accepted a position at Sylvan Lake.

Mr. Weatherall was in Edmonton on business this week.

The basement has been completed at the new Red and White store.

Many trees were planted in Bentley on Tuesday last by the Citizens of Bentley. The boulevards were planted with shrubs and trees were planted throughout the town.

The Bentley Hospital is full up again, there being 8 patients and 2 babes in at present.

Miss Lily Gyori is working in the Bentley Hospital.

Miss Alice Blaikie spent the week end in Lacombe.

Dr. Henry left for Edmonton on Monday morning.

Work has started on the new creamery, being built in Bentley this summer. The contract has been let to a Red Deer firm. The deep well is being put down at the present time.

The Rev. Mr. Moores has been transferred to Dowamills, Kent County, Ont. His duties commence there on July 1st.

Miss Siegel, of Calgary, will give a recital in the Bentley United Church, on June 3rd. Everybody welcome.

There will be a joint service in Rimbey on Sunday next, in the United Church. Rev. Mr. Moores and Rev. T. H. Chapman.

Another Tragedy

One moment quiet, unselfish labour—the next, without warning—a flame, a scream of terror, cries of agony—tragedy. Each year this Grim Drama repeats itself in hundreds of Canadian homes. Moved by a sense of thrift, many housewives, without fully realizing the cangers, attempt to do dry cleaning jobs in the Home. Such use of inflammable cleaning fluids Annually claims from 800 and 900 lives—while literally thousands of other women are permanently disfigured. The vapors arising from ordinarny cleaning Benzine are extremely volatile. ... Carelessness is not necessary as a contributing factor.

A tiny spark of Electricity from the Garment itself is sufficient to ignite the vapor and to cause a burst of flame and an explosion. For safety's sake ban all inflammable, explosive fluids from the Home. Let Your Dry Cleaning be done by a plant especially designed for the purpose. RAINBOW CLEANERS

WOE FOR WINGO

Consider the plight of Plennie Wingo, the Texan, whose idea it was to walk around the earth backward. He put mirrors before his eyes and reversed Shanks' Mare with fair success.

He covered 3,600 miles through deserts, forests and occasional heavy traffic. It was in Turkey that grief befell him. The Turkish police locked him up in the bastille because their regulations said nothing about allowing a man to cross frontiers back foremost.

It might be that they locked him up on general principles. The trouble with Mr. Wingo, now languishing behind bars, is that he came there too late. Thirty years ago, a man doing the crabwise pilgrimage would have been regarded as a hakim, or under the especial protection of Allah.

Perhaps Wingo is. Most of us have trouble enough going through traffic while looking ahead and sideways, to say nothing of attempting it backward.

SPECIAL SALE

Mr. Thos. Stoker is putting on a Special Bargain Sale at his Store Railway St., commencing today and continuing on following days. Full stock of Dry Goods and Boots and Shoes to be cleared out. Take advantage of his bargains.

3rd prize — $200.00 cash
4th prize — $100.00 cash
5 prizes, each $50.00 cash
95 prizes, each $10.00 cash
104 prizes totalling $3,000.00

$3000.00 GOODYEAR PRIZE CONTEST

Anyone from a family where a car is owned may enter, except tire dealers, employees of rubber companies and the families of both.

See the six Goodyear Tires of various sizes, types and ply-thicknesses on display here. Then estimate the number of cords in each of these tires, find a total, and divide by six to obtain the average. You may examine, too, a section of tire cord fabric also on display. Submit your estimate on the standard entry blank which is free. No other requirement. You don't have to buy anything.

Closing date: June 5th, 1932. Address: "The Goodyear Supertwist Cord Contest," New Toronto, Toronto 14, Ontario.

P. W. PRATT, Dealer
Show Rooms, Barnett Ave.
Lacombe Alta.

Come in and see Supertwist Cords demonstrated and get a helpful booklet of contest directions.

HIGHER POWERED DOLLARS

Practically every commodity is lower in price today. Current offerings of manufacturers and retailers are proclaimed as the greatest values ever offered. Perhaps no other single commodity has been so signally emphasized in this fashion as the motorcar. From the introduction of the new models last January until the present, which finds them in the middle of the normally best selling season, automobile manufacturers have stressed the striking gain in the automotive dollar's value.

The sincerity of their claim is broadly attested in many ways. One does not need to be endowed with a technical knowledge to appreciate the fact that eight cylinders at the price of four represents a bargain; that a 20 per cent increase in horsepower and a three-inch addition to wheelbase are significant of improved performance and comfort; that twelve-cylinder, 150 horsepower cars selling below the former cost of 8-cylinder, 100 horsepower cars substantiate the manufacturer's claim that he has made design and manufacturing progress worthy of attention.

In any comparitive analysis of value, the automobile enjoys a fortunate position. Its fundamental characteristics change, but only in degree. That degree is easily ascertainable and it provides a definite yardstick which measures the increase in value.

A recent analytical study along this line provides some specific information which corroborates the car maker's claim to greater value for his product. Its author goes back to the year 1929, when prosperity was general and cars were selling at an unparalleled rate.

Taking the three best sellers among the popular-priced models, he shows that their average horsepower three years ago was forty-four. Today it is sixty-three. Average wheelbase has gained approximately four inches. Equipment is more complete. Yet with it all, average price for the least expensive models in each of the three lines has dropped from $663 to $466, a decline of 16 per cent. The proportions hold true for cars in all price classes.

Thus, if the automobile may be regarded as typical of the added value in manufactured products generally, it shows that producers are making good their current advertising claims. It also indicates that although dollars may be fewer, they, like cars, are higher powered today.

COMFORT
for COLICKY BABIES
... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children, it is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

Chas. H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

WORLD HAPPENINGS BRIEFLY TOLD

The first shipment of Canadian livestock this year from Montreal to Great Britain left Montreal April 22.

Germany may refuse to pay more reparations at the end of the Hoover moratorium.

A new agricultural advisory committee will be set up in Canada to co-ordinate and give direction to the work of scientific agriculturists.

Great Britain will be the first country to come back to normal said Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain.

The volume of trade between Canada and France shows an increase of exports and a change in the trade balance to favor Canada.

Professor E. L. Harrington, University of Saskatchewan, Saskatoon, is among the newly-elected fellows of the Royal Society of Canada.

It was said in the British House of Commons that preferential tariffs to the Dominions are being abused in cases of semi-manufactured goods.

The amount and percentage of pulpwood used in Japan from Canada have increased, and the Canadian pulpwood now holds first place in volume and value.

The civil aviation branch of the department of national defence for Canada has been practically wiped out as the result of a severe cut in federal estimates.

Captain Joseph Devlin, O.B.E., is dead at his home in Burnaby, B.C., aged 83. He was born in Belfast, Ireland, and had a distinguished military career.

The new $1,000,000 Shakespeare Memorial Theatre at Stratford-on-Avon, opened by the Prince of Wales, has been described by some people as a jam factory in appearance.

The Prince of Wales will be the chief guest of the British Medical Association at their great centenary dinner at the Albert Hall in July. The party will comprise some 2,000 doctors and their wives, drawn from all over the world.

Must Start On Farm

Prosperity Will Come Back When Prices Are Better

Money may be coined in the mint at Ottawa and high tariffs may make a few men rich, but real prosperity can have its birth nowhere else than on the farm, and until our farmers can get a price for their farm products, at least in some measure proportionate to the things they are expected to buy, just so long will the present depression last.

Prosperity has to come to the farm first before it can be enjoyed by the country at large.

Four hundred plants have been found that eat insects.

The two valves of the giant clam weigh 500 pounds.

Servant (to portrait of master): "You said that I drank your wine behind your back; now I will do it to your face."—Buen Humor, Madrid.

King George Refused Stamps For Collection

Royal Family Does Not Accept Gifts From Public

American admirers of George V. and his stamp collection, who have been sending His Majesty specimens of American issues, are advised through the Associated Press that he does not accept gifts of stamps. The Royal Family of Great Britain makes a practice of not accepting gifts from the public at home or abroad. What is more, with respect to proffered gifts of American stamps, George V.'s world famous collection includes only stamps of the British Empire. This explanation is timely. An American sent His Majesty specimens of a recent issue of commemorative stamps from this country and was peevish because they were not accepted. The story got into the newspapers and tended to convey the wholly erroneous idea that King George was unappreciative of the compliment paid him by the offer of the stamps. A statement of the Royal Family's practice in such matters should be sufficient to remove any such misunderstanding.—Detroit Free Press.

Recipes For This Week

(By Betty Barclay)

PRUNE JAM

2 cups prunes.
2 oranges.
1 cup sugar.
1½ pints water.
1 lemon.
½ teaspoon salt.

Soak the prunes overnight in the water. Cook 10 minutes in the water in which they soaked, drain, and cut into small pieces. Slice the oranges and lemon, including the peeling, very thin and cook rapidly in the prune juice for 15 minutes. Add the prune pulp, the sugar and the salt, and cook until thick, stirring constantly. Seal in hot, sterile jars.

CARAMEL PUDDING WITH MARSHMALLOW WHIP

1 junket tablet.
1 tablespoon cold water.
1 pint milk.
4 tablespoons marshmallow topping.
¼ cup sugar.
¼ cup boiling water.
½ teaspoon banilla.

Dissolve junket tablet in cold water. Put sugar in a small saucepan and heat, stirring constantly, until melted and golden brown. Add boiling water and dissolve sugar in it. Add milk to caramel syrup and warm until lukewarm—NOT HOT. Remove from stove. Add dissolved junket tablet and vanilla and turn at once into individual dessert glasses. Let stand in a warm room until firm; then chill before serving. Mix the marshmallow topping with two tablespoons milk. When ready to serve the junket, top with the marshmallow mixture.

Bay Line Rates Fixed

Fictitious Mileage Plan Used As Base For Charges

The Hudson Bay railway freight tariff, long awaited by western interests, went into effect Tuesday, April 26.

The tariff is on the Fort William basis and bases the freight rate on a fictitious mileage, 130 miles less than the actual distance of the haul.

This schedule has been objected to by the Saskatchewan traffic council on the grounds that points in the western provinces will not receive the same proportionate reduction from the flat rate as those nearer to the port.

The traffic council, suggested by the provincial government some time ago, addressed a resolution to the Dominion Government and the Canadian National Railways asking that the distributing town tariff rates be applied a rate equivalent to 85 per cent. of the prairie mileage rate. This reduced rate is at the present time in effect from distributing centres on the prairies.

Tip For Farmers

A farmer was delivering vegetables to an asylum, when a patient accosted him.

"You're a farmer, ain't you?" he asked.

The farmer allowed that he was.

"I used to be a farmer once," said the inmate.

"Yes."

"Yes. Did you ever try bein' crazy?"

The farmer never had, and started to move on.

"Well, you should try it," was the ex-farmer's parting shot. "It beats farmin' hollow."

Watch Your Step

A Boston manufacturer is trying to produce a non-skid bathtub. The bathtub of today, he says, is "a thousand times more dangerous than railroad travel and two hundred times as dangerous as riding in an airplane." Watch your naked step.

Ancient Spain had a chronological system which began with 38 B.C., at date chosen for a reason not known today.

Last year more aliens left the United States than entered it.

Returned After Many Days

Marked Coin Has Long Trip Before Being Returned To Rightful Owner

Twenty years of travel, over thousands of miles and through many states, by the hand of honest men, and thieves, ended at Bakersfield, Cal., for a marked 50-cent piece, when Lee Bryan returned the coin to its rightful owner.

Bryan, grocery store manager, was a clerk in the C. A. Blodgett store, in Spokane, Wash., on March 17, 1912, when his employer marked the 50-cent piece with his initials and the date, to commemorate the birth of a son. Bryan watched the ritual.

Blodgett put the marked coin in the office safe. It nestled alongside a prized dollar, dated 1794.

Six months later the strong box was opened by burglars. They took the two keepsake coins along with other loot.

Recently, the Bakersfield grocer was counting up the cash at his store. He noted a familiar coin. It was marked half dollar, with "C. A. B.—March 17—1912" scratched on its face.

Bryan sent the coin back to his former employer.

Poultry For Quebec

Thirty-Four Incubators To Produce 900,000 Chickens This Year

Approximately 900,000 chickens will owe their life this spring to 34 incubators operated by some 13 co-operative societies in the province of Quebec, it is estimated by Hon. Adelard Godbout, Minister of Agriculture. These co-operatives were organized with the support of Mr. Godbout to meet the needs of the province without having to resort to importation from other sections of Canada or the United States.

The motto adopted by Mr. Godbout was to encourage farmers to have at least 100 hens on each farm. The fact that arrangements to fill the 34 incubators would necessitate 44 cars and a half of eggs, shows the magnitude of the industry. Estimates made by Joseph D. Barbeau, director of the provincial poultry service, bring the production of incubator chickens to 4,000,000 pounds by next fall.

Need Quality and Supply

Continuity Of Supply Is Important Factor In Holding Trade

The High Commissioner for Canada in London, England, in a recent communication to the Minister of Trade and Commerce stated: "We are careless about uniformity of quality, and seem to be almost indifferent about continuity of supply. You will readily appreciate how unsatisfactory it is when we have secured a customer for Canadian business to have him report to you shortly after that he can only get supplies intermittently, or that the goods he does get vary very considerably in quality." There is a wealth of interest in this timely message from one who is himself a farmer, and it indicates a way in which agriculture may well give a lead to Canadian business by developing both quality and continuity of supply to the British market. — Department of Agriculture, Ottawa.

Ice Cream Is a Real Food

Should Always Figure Whenever Possible On the Daily Menu

The official records of the Department of Agriculture at Ottawa show that ice cream is one product which is steadily growing in popular favour in Canada. It is a dairy product which contains all the food properties of milk, with the addition of butterfat in the form of cream or sweet butter. The protein is the protein of milk, and the vitamines of milk are retained in the ice cream; while the sugar (cane, honey, or maple) used in its making is an energy producing food. Ice cream is a food and ought always to figure in the menu, helping most importantly as it does to maintain health, strength and vigour. It is one of the most important foods in the hospital and sick room, and is the one food which combines rare palatability with high food value.

Stately Game Bird

Take Measures To Introduce Pheasants In Saskatchewan

Shipments of 2,500 pheasants' eggs are being brought into Saskatchewan to be placed on suitable farms for hatching for the purpose of establishing the stately game bird as a denizen of the prairies, it was announced by A. E. Bence, K.C., president of the Saskatchewan Fish and Game Protective Association.

Regina and the south have raised sufficient funds for about 1,200 eggs, while numerous applications have been received from farmers in the northern part of the province, some of whom had experience in the Old Country as gamekeepers.

Mr. Bence is also endeavoring to secure some settings of the Chinese or Mongolian pheasants from Nebraska.

"Daddy, what is 'influence'?"

"Influence, my son, is a thing you think you have until you try to use it."

You can't play truant from the school of experience.

Fashion

By Annette

DELIGHTFULLY BECOMING TO THE HEAVIER FIGURE IS SIMPLE STRAIGHT LINE DRESS

Here are charming lines for the matron. And into the bargain, it is a very simple dress to fashion.

The bodice is given a gross-closure effect, so slimming, through a neat inset vest, that scallops its outer edge. The skirt has two little plaits at either side of the center-front, creating a center panel to give the figure height and grace.

It can be made with short or long sleeves, just as you please about it.

It's very smart in printed crepe silk with plain contrast.

There are many rayon novelties smart to fashion it for home wear.

Sheer woollens are also suitable.

Style No. 942 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4¼ yards of 35-inch material with ½ yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Town

Was Famous Restaurant

Place Patronized By King Edward To Be Sold At Auction

Romano's Restaurant in the Strand, London, England, the center of London's gayest life in "the naughty nineties," will be sold at auction soon. The restaurant was established 70 years ago as a fried fish shop, but its prominence did not come until D'Oyly Carte, producer of Gilbert and Sullivan operas, discovered "the best macaroni in town" could be had there. It was rebuilt after a fire in 1894 and soon artists, literary men and even King Edward VIII. became its patrons.

It Takes No Extra Time

To say "thank you."
To think kindly of your associates.
To be orderly and neat.
To hold your tongue.
To smile when you meet your friends.
To take orders from superiors cheerfully.
To thank God for each day's blessings.

The first woman to obtain a license to drive an auto in France was the Duchess of d'Uzes.

Cause Of Rail Wrecks Eliminated By Science

Canadian Discovery One Of the Most Important Research Advances In Years

Reducing the danger of train wrecks due to faulty rails to an absolute minimum, a new method of treating the steel used in rail manufacture, as developed by Canadian experts, is hailed as the most important improvement in this field to be announced in years.

Details of the research are announced by the Canadian Institute of Chemistry.

It has been known for a number of years that whenever a rail has failed or split due to what is known to engineers as a transverse fisure, or crack in the steel, microscopic examination of the faulty piece showed a number of small cracks in the centre of the mass of metal. Engineers gradually became convinced that these cracks were the cause of split rails, but were unable to find a way of preventing them. It was observed that the same type of cracks, called "shatter cracks" by metallurgists, could be found in new rails that had never been in service, so it was concluded that they were produced during the preparation of the steel.

It remained for I. C. Mackie, well known Canadian metallurgist and Fellow of the Canadian Institute of Chemistry, working in the Sydney laboratories of the Dominion Steel and Coal Corporation, to discover the remedy. His process, considered by technical men the most important advance in recent years, consists in a special heat treatment of the metal. Usually, when the steel, red-hot, leaves the rolls in the rolling mill, it is cooled down fairly quickly, especially after it has reached what metal workers call the "black heat" stage—that is, when all redness has disappeared but the steel still has a temperature of 500 or 600 degrees. Mr. Mackie discovered that it is at this stage that the minute cracks, which later result in failure of the tracks, develop, and he worked out a special way of treating the steel to avoid this trouble.

The new process consists in cooling the steel down very slowly, so slowly indeed that it takes over 24 hours for a rail to cool by this method as against three or four by the usual procedure. Mr. Mackie and his colleagues have found that this treatment is a 100 per cent. cure for the troublesome "shatter cracks." A great advantage of the method is that it has no effect on the hardness of the steel.

Of course, as pointed by Mr. Mackie, rails made by this process have not yet been in service long enough to prove by practical test that they will not fail, but as all engineers are agreed that the failure is due to these minute cracks, and as the new process completely eliminates these cracks, it is reasonable to suppose that the rails will stand up better in use than those made in the ordinary way.

Canadian metallurgists consider this discovery to be of prime importance, and are gratified that, while others have studied this problem for a number of years, its final successful solution was worked out by a Canadian.

Saving Life At Sea

King George Confers Albert Medal For Gallantry

The London Gazette announces King George has conferred the Albert medal for gallantry in saving life at sea on William George Johnson, master watch aboard the sealer "Viking," which sank March 15, 1931, off Horse Island, Nfld., following explosion of dynamite in the hold.

Johnson himself injured, remained three days in a dory with two badly hurt companions, Alfred Kean, mate, and Fred Best, seaman, until all three were rescued by the steamer "Beothic." He had the option of attempting to make land over tightly packed ice.

The crew of the "Viking" was engaged in making a motion picture of life in Newfoundland's sealing hunts, under direction of Varrick Frissel, New York producer, who was among the score lost when the vessel sank.

There is so much silver in photographic solutions that every million feet of waste movie film yields 800 ounces.

SON (to father, who has been studying his pass-book): "Why do they call your bank book a 'Pass-Book,' Dad?"

FATHER (a bridge addict): "Because it's too weak to make a call on."—The Humorist, London, England.

The Fanning Mill

Valuable Information Regarding Its Use and Operation

(By H. G. L. Strange)

Seed drill surveys that have been made by the Dominion Seed Branch show without a doubt that a vast amount of weed seeds and other impurities are seeded into the ground each year with seed grain. Investigation further shows that most of this grain had been cleaned through fanning mills. The reason for these impurities being present in the seed is unquestionably due to the fact that it is very difficult to clean grain properly with the average fanning mill.

Based on the experience of many years of cleaning Registered Seed to the high standard of perfection required by the Seeds Act, the writer has worked out a method of cleaning seed with a simple farming mill that will be found to be simple and effective.

In the first place only two screens are really needed for a fanning mill —a top screen that will scalp off large grains, pieces of straw and parts of unthreshed heads, and a smaller screen underneath that will allow the weed seeds, small cracked grains, etc., to pass through, leaving on top of the bottom screen only the large plump kernels required for seed. A fanning mill, using two good screens as described, will do just as good work as will those fitted with banks of screens—perhaps better. Some of the large kernels, however, will be light, so that a strong air blast is necessary to blow them out. The mill should be turned at such a speed that will produce such a blast of air as will blow lover at least 90 per cent. of the grain, then it is certain that all light kernels are being separated.

If a fanning mill would continue to operate in this manner no weed seeds or other impurities would be present in the final cleaned seed. Unfirtunately the average fanning mill will not continue to work in this fashion for more than a few moments, the reason being that the screen, both top and bottom, particularly the bottom screen, very quickly plug up with small kernels, and so allow the weed seeds and impurities to pass over with the good grain.

Some fanning mills are fitted with devices that keep the screen clean such as tapping hammers or travelling brushes. These devices, however, are very expensive and very few can afford them. A fanning mill without these extras can be made to do good work providing the operator will stop the machine at least every five minutes, remove the screens and carefully clean them with a stiff brush. If this is not done it is quite certain that most of the work of fanning grain will be wasted and that the seed will contain many weeds and other impurities.

Besides cleaning the screens frequently it is, of course, necessary to see that the grain is fed very slowly and evenly on to the screens and that the machine is also turned evenly, but fast enough to produce, as mentioned above, a strong blast of air.

All grain should be put at least twice through the fanning mill in this manner, feeding slowly each time. It is the writer's experience that the capacity of most fanning mills is estimated by the manufacturers on a basis of grain cleaning for market rather than for seed cleaning. Most machines, for instance, that are listed at 25 bushels an hour, will do a good job on seed at about eight bushels per hour only, and if more is forced through it is at the expense of good work. The machine of course must be set level and should be spliced or fastened solidly to a good stout floor and facilities should be provided to see that there is no chance scalpings or screenings from either the screens or the wind becoming mixed with the good cleaned seed.

Fanning mills with screens only separate according to the difference in width of kernel. To separate kernels of different lengths, that is to say, wheat from oats, etc., it is necsary to use what is called an indentation machine such as a Carter Disc or an indent cylinder. The most perfect job of seed cleaning is offered by travelling or stationery plants in which the grain is first passed through a good fanning mill with a strong blast of air, then through either an indent cylinder or a Carter Disc. The average fanning mill, using screens alone will not separate wheat from oats or vice versa.

Problem Of Today

A fellow has to be a contortionist to get by these days. First of all, he's got to keep his back to the wall and his ear to the ground. He's expected to put his shoulder to the wheel, his nose to the grindstone, keep a level head and both feet on the ground. And at the same time look for the silver lining with his head in the clouds—So says an exchange.

Value Of Walking

It is interesting to note that the habit of "hiking" is returning to favor. It seems to be one of those unexplained changes in customs which come over the world from time to time; and the peculiar—and also encouraging—feature of the new idea is that it is finding favor with the young people. Walking is one of the finest forms of exercise.

"YES, I AM 40 YEARS OLD!" says Irene Rich

"YES, I am 40 years old. I don't mind confessing it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know.

But, in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—686 of the 694 important ones! *"I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."*

Surely you will want to try this fragrant, white soap. The caress of dollar-a-cake French soap for 10c.!

IRENE RICH and her two daughters (left to right), Frances, twenty-one years old, Jane (in background), fifteen, their mother, actually 40! (above). One of Miss Rich's recent photographs.

Salada Reduces Tea Prices

Salada Tea Company Makes Important Announcement

An announcement of a price reduction has just been made by Salada Tea Company of Canada, Limited, amounting to 10 cents a pound. Mr. A. M. Wilson, manager of the Company, who has been in Winnipeg for the past few days conferring with Mr. R. M. Gibson of Messrs. Gibson, Paterson, Limited, the Company's western representatives, has this comment to make on the new prices announced by his Company:

"Teas are cheaper in the primary markets in London, England; Colombo, Ceylon, and Calcutta, India, although best quality teas have not declined in price to nearly the same extent as the lower grades. Nevertheless, the Salada Company, while rigidly maintaining the quality of its product, has reduced prices twice within the last two years, so that today the consumer is paying 25 per cent. less for this well-known product than he did in 1930. The price reduction had been contemplated for several weeks, but was postponed until after the announcement of the Dominion budget proposals in the House of Commons. Tea merchants expected a further tax on tea, but, as there was no additional impost announced, they were able to make a downward revision of 10 cents on the pound, or 5 cents on the half-pound."

Device Would Be Welcomed

Maintains Even Temperature and Eliminates Dust On Trains

The Chesapeake and Ohio railroad recently announced inauguration of a new fast passenger train, the George Washington, on which every coach and pullman will be fitted with an elaborate air conditioning apparatus. Even temperatures will be maintained constantly, dust will be eliminated, and the passengers will be kept comfortably cool in summer.

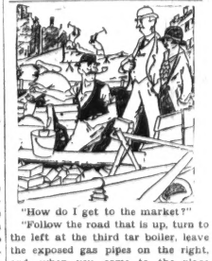

That such devices will become common equipment on all crack passenger trains in due time seems probable. That they will, in addition, come into general use in homes and apartments is also probable.

Radio On the Desert

Camel passengers crossing the Arabian desert may listen to radio selections from radios strapped on the backs of "ships of the desert." The camels are reported from Aden as bearing up well, even though loudspeakers are being placed near wells at regular stopping places.

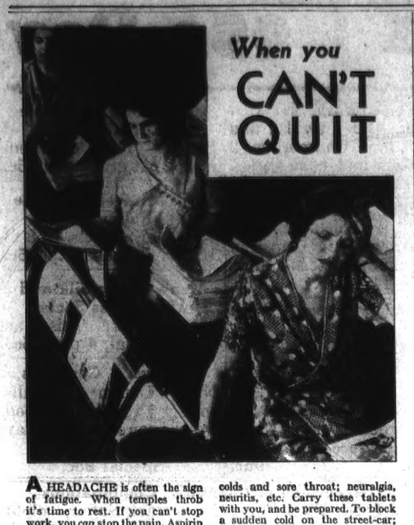

"What do they mean when they say Washington, D.C.?" asked the teacher.

"Washington de capital," piped up a little chap.

"How do I get to the market?"

"Follow the road that is up, turn to the left at the third tar boiler, leave the exposed gas pipes on the right, and, when you come to the place where the tramlines are up, that is the market."—Lustige Kolner Zeitung, Cologne.

When you CAN'T QUIT

A HEADACHE is often the sign of fatigue. When temples throb it's time to rest. If you can't stop work, you *can* stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry-on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches, colds and sore throat; neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To block a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for *any* ache or pain, and take enough to *end* it. It can't harm you. At drug stores everywhere. Made in Canada.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Hodder & Stoughton, Ltd., London.

CHAPTER XX.

The Shadow Of the Future

Gold of gorse and purple of heather, a shimmering haze of heat quivering above the undulating green of the Moor, and somewhere, high up in the cloud-flecked blue above, the exultant, piercingly sweet carol of a lark.

"Oh! How utterly perfect this is!" sighed Jean.

She was lying at full length on the springy turf, her chin cupped in her hands, her elbows denting little cosy hollows of darkness in the close mesh of green moss.

Tormarin, equally prone, was beside her, his eyes absorbing, not the open vista of rolling moor, hummocked with jagged tors of brown-grey stone, but the sun as it rioted through a glory of red-brown hair and touched changeful gleams of gold into topaz eyes.

There was a queer little throb in Jean's voice, the low note of almost passionate delight which sheer beauty never failed to draw from her. It plucked at the chords of memory, and Tormarin's thoughts leaped back suddenly to that day they had spent together in the mountains, when, as they emerged from the pinewood's gloom to the revelation of the great white-pinnacled Alps, she had turned to him with the rapt cry: "It's so beautiful that it makes one's heart ache!"

"Do you remember——" he began involuntarily, then checked himself.

"'M-m?" she queried. The little interrogative murmur was tantalising in its soft note of intimacy.

The Jean of the last few days—the days immediately following their quarrel—had temporarily vanished. The beauty of the Moor had taken hold of her, and all the mockery and bitter-sweetness which she had latterly reserved for Tormarin's benefit was absent from her manner. She was just her natural sweet and wholesome self.

"'M-m? Do I remember—what?"

"I was thinking what a pagan little beauty-lover you are! You worshipped the Alps. Now you are worshipping Dartmoor."

She nodded.

"I don't see why you should call it 'pagan,' though. I should say it was equally Christian. I think we were meant *to* love beauty. Otherwise there wouldn't have been such a lot of it about. God didn't put it around just by accident."

"Quite probably you're right," agreed Blaise. "In which case you must be"—he smiled—"an excellent Christian."

"Positively I believe they're talking theology!"

Claire's voice, girlishly gay and free from the nervous restraint which normally dulled its cadence of youth, broke suddenly on their ears, as she and Nick, rounding the corner of a big granite boulder, discovered the two recumbent forms.

"You disgustingly lazy people!" she pursued indignantly. "Everybody's dashing wildly to and fro unpacking the lunch baskets, while you two are just lounging here in blissful idleness!"

"It's chronic with me," murmured Tormarin lazily. "And anyway, Claire, neither you nor Nick appear to be precisely overtaxing yourselves bearing nectar and ambrosia."

"I carried some of the drinks up this confounded hill," submitted Nick. "And damned heavy they were, too! I can't think"—plaintively—"why people should be so thirsty at a picnic. I'm sure Baines has shoved in enough liquid refreshment to float a ship."

"Praise be!" interpolated Blaise piously.

"Oh, we've done our share," supplemented Claire. "And now we're going to the gipsy who lives here to have our fortunes told."

"Before lunch," subjoined Nick, "so that in case they're depressingly bad you can stay us with flagons afterwards."

Jean sat up suddenly, her face alight with interest.

"Do you mean that there is a real gypsy who tells real fortunes?" she demanded.

"Yes—quite real. She's supposed to be extraordinarily good," replied Nick. "She is a lady of property, too, since she has acquired a few square yards of the Moor from the Duchy and built herself a little shanty there. She rejoices in the name of Keturah Stanley."

"I should like to have my fortune told," murmured Jean meditatively.

"I'll take you," volunteered Blaise.

There was a suddenly alert look in his face, as though he, too, would like to hear Jean's fortune told.

"We'll all go, then," said Claire. "You must let Keturah tell yours as well, Blaise."

He shook his head.

"Thanks, no," he answered briefly. "I know my fortune quite as well as I have any wish to."

Tormarin's curt refusal somewhat quenched the gaiety of the moment, and rather soberly they all four made their way down the slope to where, in a little sheltered hollow at the foot of the tor, the sunlight glinted on the corrugated iron roofing of a tiny two-roomed hut, built of wood.

Outside, sitting on an inverted pail and composedly puffing away at a clay pipe, they discovered a small shrivelled old woman, sunning herself, like a cat, in the midday warmth.

She lifted her head as they approached, revealing an immensely old, delicately-featured face, which which might have been carved out of yellow ivory. It was a network of wrinkles, colourless save for the piercing black eyes that sparkled beneath arched black brows, while the fine-cut nostrils and beautifully moulded mouth spoke unmistakably of race—of the old untainted blood which in some gypsy families has run clear, unmixed and undiluted, through countless generations.

There was an odd dignity about the shrunken, still upright figure as she rose from her seat—the freedom of one whose neck has never bowed to the yoke of established custom, whose kingdom is the sun and sea and earth and air as God gave them to Adam—and when the visitors had explained their errand, and she proceeded to answer them in the soft, slurred accents of the Devon dialect, the illiterate speech seemed to convey a strange sense of unfitness.

Claire and Nick were the first to dare the oracle. The old woman beckoned to them to follow her into the cottage, while Tormarin and Jean waited outside, and when they emerged once more, both were laughing, their faces eager and half excited like the faces of children promised some indefinite treat.

"She's given you luck, then?" asked Jean, smiling in sympathy.

The gipsy interposed quickly.

"'Tezn't for me to give nor take away the luck. But I knaw that, back o' they gert black clouds the young lady's so mortal feared of, the zun's shinin' butivul. I tell 'ee, me dear"—nodding encouragingly to Claire, while her keen old eyes narrowed to mere pin-points of light—"you'll zee it, yourself—and afore another year's crep' by. 'Ess, fay! You'll knaw then as I telled 'ee trew."

Then, with a sudden gesture that summoned Jean to follow her, she disappeared once more into the interior of the hut.

Jean hesitated nervously in the doorway. For a moment she was conscious of an acute feeling of distaste for the impending interview—a dread of what this woman, whose eyes seemed the only live thing in her old, old face, might have to tell her.

"Come with me," she appealed to Blaise. And he nodded and followed her across the threshold.

The scent of a peat fire came warm and fragrant to her nostrils as she stepped out of the sunlight into the comparative dusk of the little shanty, mingling curiously with an aroma of savoury stew which issued from a black pot hung above the fire, bubbling and chuckling as it simmered.

The gipsy, as though by force of habit, gave a stir to its contents and then, settling herself on a three-legged stool, she took Jean's hand in her wrinkled, claw-like fingers and peered at its palm in silence.

"Your way baint so plain tu zee as t'other young lady's," she muttered at last, in an odd, sing-song tone. "There's life an' death an' fire an' flame afore yu zee the sun shinin' clear. And if so be yu take the wrong turnin', you'll niver zee it. And there'll be no postes to guide 'ee. Tez your awn sawl must tell 'ee how to walk through the darkness. For there's darkness comin' black darkness."

(To Be Continued.)

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissues, making the skin truly rose-leaf in texture.

Fire Prevention

Extra Precaution Is Needed This Year On Account Of Fire-Ranging Forces Being Reduced

In several of the Canadian provinces this year the fire-ranging forces will be seriously reduced on the grounds of economy. The fire hazard cannot be predicted, hence a call is being made by the Canadian Forestry Association to all patriotic citizens to exert the utmost vigilance this year and supplement to the utmost degree the shortage of fire rangers. Forest fire prevention for many years past has been making great strides owing to the splendid co-operation of the people who work in or travel through the bush country. The approaching spring and summer will demand the greatest precautions by every Canadian if catastrophe is to be averted.

First Channel Swim

The first English Channel swim was made in 1875 by Captain Matt Webb of England. He completed the distance in 22 hours and 45 minutes.

A railway 328 miles long and connecting Bangkok and Singapore, has been completed in the Federated Malay states and runs for many miles through uninhabited jungle.

Three of England's rulers each held away for more than 50 years. They were Henry III., George III., and Queen Victoria.

Porto Rico embroidery factories have improved their product and exports are increasing.

The United States has 15 battleships and 1,908 fighting 'planes.

Reduce the Acid

SICK stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated.

Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless dose neutralizes many times its volume in acid. For 50 years the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go, prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians in correcting excess acids.

W. N. U. 1940

Will See Canada

Largest Trans-Atlantic Liner To Run Excursion From New York To Halifax

Cruises from New York to Halifax by several of the largest trans-Atlantic liners are to be made during the summer months of this year with stop-over privileges in Canada good for several weeks. This stop-over concession was not granted last year when over 22,000 passengers were carried on the 30 cruises from New York to the Capital of Nova Scotia.

Among some of the liners scheduled for the 40 cruises arranged for this year are the "Berengaria," "Aquitania," "Mauretania," "Transylvania," Homeric," "France," "Paris," "Leviathan," and "Belgenland."

Meanwhile the Nova Scotia government is making arrangements to have the attention of the visitors directed to the attractions the province offers to the holiday seeker. Nova Scotia has a long and romantic history. The province was discovered by John Cabot in 1497 and the first settlement dates from 1518. At Port Royal, now Annapolis Royal, 127 miles from from Halifax, the first cultivation of the soil in Canada was undertaken in 1605 and in that year at that spot was grown the first wheat raised in North America. There, too, in 1605 the first water wheel to turn a millstone for the grinding of wheat on the North American Continent was operated. En route from Halifax to Annapolis Royal, is the Land of Evangeline so romantically dealt with by the American poet, Longfellow. At Grand Pre, 57 miles from Halifax, the church of Evangeline and Evangeline's Well may be seen. Grand Pre is only one of several places of interest in the Annapolis Valley, one of the most beautiful and productive sections of country in North America. It is principally famous for fruit-growing.

Halifax, the Canadian port of the cruises, is one of the oldest cities in Canada. It has one of the finest natural harbours in the world. The city was founded in 1749 by Lord Halifax. It has a population of 60,000.

Several cruises are also to be run from New York to Quebec and Montreal by the principal steamship companies and some of the largest vessels afloat will be used on these cruises.

A Newspaper's Business

Is To Report Things As They Actually Happen

It would be comical, were it not somewhat pathetic the way newspaper offices are besieged every day by their friends, urging them to "roast" this and that; to "see to it" that this and that is corrected; to have this and that done in the city or country; to start this and that kind of movement to correct evils in the state government. These friends actually appear to believe that it is the newspaper's business to handle all these affairs.

But a self-respecting newspaper, though ready and willing to carry all reasonable responsibility, must remind its readers that they—the people—are the authority upon whom rests the responsibility for the present state of affairs, local, provincial and federal.

A self respecting newspaper tries to report the news of what actually happens, not what it might wish had happened. The relation of a self respecting newspaper to the general public is not always understood. It is the duty of a newspaper to be in a position to support any good act and criticize any bad act of public policy.

This relationship cannot exist where favors are asked and granted. Honesty is the only policy for a newspaper.

If the objectors don't like the way things are going they should qualify as voters, and then raise cain about it.

A Matter Of Years

A little fellow took up his grandmother's spectacles and put them on. Then peering through the glasses he frowned and said: "But I can't see, grandma, there must be something between my eyes and the glasses. What is it?"

"Seventy years my child," the old lady answered.

Newspapers certainly do everything in their power to protect the public. They print storm warnings, flood warnings, warnings of epidemics and advance radio programmes.

The University of California has a machine that makes artificial snowflakes by mixing a cold and dry current of air with a warm and moist one.

A man weighing 130 pounds on earth would weigh about 377 pounds on Jupiter.

for SPRAINS

Rub Minard's in gently. It penetrates sore ligaments, allays inflammation, soothes, heals.

Puts you on your feet!

MINARD'S "KING OF PAIN" LINIMENT

"No repairs in 22 years," says home owner

"Visitors are delighted with the noiseless operation of my doors," says a home owner of Monongah, West Virginia. "The locks and hinges have been in active service 22 years, and during this time I haven't spent a cent for repairs. I've never used anything but 3-in-One Oil."

Many housewives who pride themselves on the spotless appearance of their homes are careless about the lubrication of hinges and locks. Try a few drops of 3-in-One Oil today and see how quickly it brings out rust, dirt and squeaks. For 3-in-One, a blend of animal, mineral and vegetable oils, is distinctly different from ordinary oil; it cleans and protects as well as lubricates.

For 35 years 3-in-One has been recognized as the best oil for sewing machines, vacuum cleaners, lawn mowers, hinges and general household lubrication. Insist on 3-in-One Oil. At good stores everywhere. For your protection look for the trade mark "3-in-One" printed in Red on every package.

Books Mailed To Blind

Free Postage Allowed Large Lending Library In Toronto

Toronto has one of the three largest "blind" libraries on the continent. More than 12,000 volumes in Braille and 2,555 in Moon's type fill the shelves of the library of the Canadian National Institute for the Blind.

"Blind people do not call for their books, like ordinary subscribers do," said S. C. Swift, the blind librarian, who has read every volume on the shelves. "Their books are ordered and mailed to them by parcel post in a special canvas bag." He explained that there was free postage for such material in the mails due to the efforts of Sir William Mulock when postmaster-general.

Blind people read many books, said Mr. Swift, who estimated that a slow reader might read one or two volumes each month, while a rapid reader covered from 18 to 20 in the same period. Each ink print book required from three to four volumes in Braille, he said, and an even greater number in Moon's type. Braille was used by younger blind people, whose fingers were more sensitive and not so easily tired.

THE RHYMING OPTIMIST

By Aline Michaelis

THEFTS

For some loss, sorrow is but brief;
For some, it reigns supreme,
But, ah! I would not be the thief
Who steals away a dream!

Perhaps, who knows, if sorely pressed,
And wan with want and dread,
By some fierce, vital urge possessed,
I might steal meat or bread.

The precepts of the years might wane,
The thought of thine and mine,
Before stark hunger's gnawing pain
Obscuring life's design.

For none can know his strength until
Temptation comes his way,
Or take the measure of his will,
Untested by the fray.

Some loss is but a falling leaf
Upon an autumn day;
But, ah! I would not be the thief
Who steals a dream away!

To Observe the Eclipse

British Women To Travel To Canada In Interests Of Astronomy

Several women will accompany three parties of astronomers who are going from Britain to Canada to observe the eclipse of the sun, which will be visible there on August 31.

An official of the Royal Astronomical society said to a reporter: "There are about 70 women Fellows of this society. They are not all in Great Britain, a number of them are American.

"Women now take a great interest in astronomy."

Observations of the eclipse, which will last 90 minutes, will be made from Parent, North Quebec, Magog, Quebec, and Montreal.

The three British parties will represent the Royal Observatory, Greenwich, the Imperial College, South Kensington, S.W., and Cambridge.

Britain's Youthful Peers

Thirty-Two Are Not Old Enough For House Of Lords

Britain has 32 peers who cannot take their seats in the House of Lords because they are not of age. Many bearers of old titles are still playing with their blocks, among them being Lord Wraxhall, three, and Lord Montagu, of Beaulieu, five. Lord Gainsborough is eight. Lord Haig, son of the late British Commander, is 13. The Earl of Shrewsbury and Talbot, who is premier earl in the peerages of both Lord England and Scotland, is 17, as is Lord Gormanstan, premier viscount of Scotland.

"It is easy to give; it is harder to make giving unnecessary," says Henry Ford, but that actually seems to be the next problem before us. Let's tackle it.

A doctor says that chocolate is a good substitute for beer. But chocolate never made men link arms in the street at 2 a.m. and sing "Sweet Adeline."

About one-fourteenth of the entire body weight of a human is blood.

It's Always Harvest Time

Swing Of Harvest the Year Round In Various Countries

We are so used to thinking of world events in relation to east and west that it is really refreshing to consider the swing of harvest time the year round from north to south. Here's how it swings:

January:—Argentine, Uruguay, Chile and Australia.

February:—Upper Egypt and Southern India (end of harvest in Southern Hemisphere and beginning of harvest in northern).

March:—Egypt, Tripoli, Morocco and India.

April:—Persia, Mesopotamia, Arabia, Asia Minor, Syria, Cyprus and Mexico.

May:—Algeria, Tunis, Central and Southern Asia, South Carolina, Georgia, Alabama and Louisiana.

June:—Italy, Spain, Portugal, Greece, Turkey, South of France, North Carolina, Georgia, Arkansas, Texas, Virginia, Indiana, Illinois, Kentucky, Tennessee, Oklahoma, Missouri and Kansas.

July:—France, Austria, Hungary, Roumania, Bulgaria, Ser-Croat-Slovene State, Switzerland, Southern Russia, Southern Germany, South of England, New York, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Missouri, Nebraska, Kansas and Oregon.

August:—Southern Canada, Russia, the United Kingdom, Germany, Belgium, Holland, Denmark, Minnesota, North Dakota, South Dakota, Montana, and Washington.

September:—Sweden, Norway, Siberia, Northern Russia, Canada, North Dakota and Montana.

October:—Sweden, Finland, Northern Russia, Northern Canada, Norway, Alaska (end of harvest in northern hemisphere and beginning of harvest in southern.)

November. — Peru and South Africa.

December:—Burma and Argentina.

Inventors Keep Busy

Automatic Oyster Opener Prize Of This Year's Exhibition

Double-action fly swatter—nonskidable soap—bell-ringing fishing rods—toothpaste tube collapsers — automatic oyster openers—adjustable baby feeders.

These are among the 5,000 inventions arriving at Grand Central Palace for the fourth international patent exposition.

The new fly-swatter operates with a scissors movement and eliminates the possibility of spots on walls or furnishings.

The soap turns out to be a sponge-rubber mitten with a ventilated palm in which liquid is enclosed. The suds force their way through. The toothpaste tube collapser is two rollers turned by a small crank and forces out every last drop of the paste.

One fishing rod has a bell attached and can be stuck in the ground while the angler drowses. When the fish bites the bell rings.

The automatic oyster opener is really the prize of the show. Its inventor is Oscar Abbatte, of Baltimore, Md. The device is operated by means of a crank which forces a flat, spear-shaped knife between the shells of the oyster, opening 25 a minute.

The baby feeder is merely an adjustable bottle which can be attached to the crib and never eludes the reach of the occupant.

The Farmer's Education

Knowledge Is As Necessary On the Farm As In Any Other Line Of Endeavor

An outstanding Canadian authority discussing farming as a vocation recently, included among the essential subjects in the educational preparation for farm work, the following: A thorough training in the use of English; proficiency in mathematics; sufficient commercial training so as to successfully carry on his business; practical training obtained on the farm; a study of agricultural science including chemistry, physics, botany, entomology, bacteriology, and a thorough knowledge of the more practical subjects such as horticulture, field crops, livestock, mechanics; and a practical working knowledge of economics and civics. For the young woman whose future happiness will be found on the farm he suggested special training in cultural subjects, and in the work of the home, such as cooking, sewing, management, and hygiene. Knowledge is as necessary to success in farming as it is in any other line of business.

London has a quiet office campaign to increase the efficiency of stenographers.

The farther inland trout are taken, the darker the flesh.

ACIDITY FOR 10 YEARS

Before he Found the Remedy

Many people endure suffering unnecessarily. This man did. If he had known ten years ago what he knows to-day, he would have been spared a great deal of suffering.

"I feel I must write a few lines in appreciation of your Kruschen Salts. I have suffered for 10 years from chronic acidity of the stomach. I tried nearly everything, until I was advised by a friend to try Kruschen, which I have taken for the last two months, and I am pleased to say I have had no return of the acidity."—W. B.

Kruschen Salts swiftly neutralises acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and sweet. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel wonderfully energetic and well. As healthy and hearty as it is humanly possible to feel.

Little Helps For This Week

"Thou hast put gladness in my heart."—Psalm iv. 7.

Cheerfulnesse
Doth expresse
A settled, pious myndе,
Which is not prone to grudging,
From murmuring refined.
—Anne Collins.

What indeed does not that word cheerfulness imply? It means a contented spirit; it means a pure heart; it means a kind loving disposition; it means humility and charity; it means a generous appreciation of others, and a modest opinion of self. —William Makepeace Thackeray.

It is a Dutch proverb that "paint costs nothing," such are its preserving qualities in damp climates. Well, sunshine costs less, yet is finer pigment; and so of cheerfulness, the more it is spent, the more of it remains.—Ralph Waldo Emerson.

The Written Word

The Difficulty Of Expressing Ideas In Proper Form

Writing the setting together of words and phrases and sentences to the expression of a thought, looks easy and yet there are many persons who find it no simple task to say in words precisely what they want to say.

Arthur Brisbane, editor and writer, from the heights of success, offers some useful advice. Learn to be critical of your own writing. Use adjectives sparingly. Avoid "fine" writing. "If you write anything of which you are particularly proud cut that out, or at least cut it in two." Superfluous words and muddled thinking are the primary literary evils, according to Mr. Brisbane. "There is seldom such a thing as difficulty in writing," he says truly, "but there is often a difficulty in clear thinking."—Ottawa Journal.

A Real Masterpiece

Total Length Of Forth Bridge Exceeds 8,000 Feet

Sydney Bridge is constantly referred to as the "largest in the world," whereas it is only the largest single-span bridge. This span measures 1,650 feet. On the other hand, each of the two main spans of the Forth Bridge is 1,710 feet, while its total length exceeds 8,000 feet. The main structure could swallow three Sydney bridges. Without minimizing a wonderful engineering feat, the Forth Bridge surely remains man's most majestic mechanical masterpiece.

Fails In Its Purpose

Famous Wall Of China Does Not Keep Out Invaders

"The Wall of Ten Thousand Lii," that massive rampart built hundreds of years ago by the Chinese to keep out invaders, has again failed in its purpose. This is said to be the greatest piece of constructive labor ever accomplished by the human race. The wall is 1,700 miles long, has an average thickness of 20 feet and height 22 feet with towers about 40 feet high at intervals of some hundred yards.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

She—Why did the land agent speak of that property as a parcel?

He—Because it is tied up, I suppose.

The U.S. army and navy have 12 standard sizes of flags.

MILBURN'S HEART AND NERVE PILLS

Price 50c a box

Nerves A Complete Wreck Sat Up Half The Night

Mrs. John Rose, Bark Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I used one box and got relief, and by the time I had taken six boxes I was as well as ever."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

FOREST DESTRUCTION IN ALBERTA SERIOUS

Considered from the standpoint of destruction of forest resources, the fire season of 1931, reports the Alberta Department of Lands and Mines, was probably the most disastrous on record. Weather conditions prevailing during the winter of 1930-1931 were such that fires started readily and burnt into the ground, thus providing a start for destructive fires in the Spring. On the forests of the east slope of the Rocky Mountains it was necessary to fight fires on several occasions during the winter.

As a result of winter conditions and of the weather and ground conditions early in the spring whereby fires spread rapidly; fires set for the purpose of clearing land and fires from other causes, assumed dangerous proportions and resulted in an enormous loss of forest resources and of private property. In addition the productivity of the soil is greatly damaged.

An examination of fire causes, state officials in charge of forest preservation, leaves no doubt as to the responsibility of individuals and indicates that little or no thought was given to the results. In many instances the danger to life and to the destruction of public and private property was entirely overlooked. Improvements on neighboring lands were destroyed and no thought of the importance of individual welfare in the success of the community. In order to clear comparatively small areas, fires were indiscriminately set which destroyed large areas of important forest cover, which areas in a great many instances would at a later date contribute in no small way to the welfare of the individual and the community.

Settlers' fires dealt with by the forest reserve numbered 136, being 21.86 p.c. of the total fires dealt with.

The statement of the department concludes:

"Campers, which includes all forest travellers, contributed to the destruction in no small way. Carelessness, laziness and ignorance no doubt explains why 147 fires are known to have originated with campers. It is difficult to understand why people who go to the forest for recreation or who obtain their livelihood from the forest, should be guilty of such carelessness. In the province of Alberta are found conditions more favorable to outdoor recreation than in many countries. There is an abundance of game birds, fish and big game. These, however, cannot exist if forest destruction continues at the rate of 1931."

HALF HOLIDAYS START JUNE 1

Store Wednesday half holidays for June, July and August begin Wednesday, June 1st, stores closing at 12 o'clock noon.

Here and There

Practically an egg a day is eaten by every man, woman and child in Canada. The average per capita yearly consumption of eggs in the Dominion is 361, the highest of any country, according to an official computation.

Canada's gold production in 1931 reached the new high total of 2,682,776 ounces valued at $55,457,900. This is 27.6 per cent above the 1930 production. Of this total the province of Ontario accounted for 2,079,752 ounces valued at $42,992,288.

New Brunswick can now claim the rare distinction of producing a white squirrel. The animal was caught by Jack Felsing of Fredericton who trapped it near the village of Lincoln. It has been bought by the government and will be mounted and placed on exhibition.

Hon. Cairine Wilson, Canada's only woman Senator, arrived recently at Quebec on board the Empress of Australia, from a trip through Europe. While in London she visited the House of Lords, but could not make comparisons with the Senate since the House was not in session.

Western plains have been given a boost by the rains of the last days of April and farmers of the prairie provinces are cheered by fine seeding conditions and good prospects of crop success, according to information summarized by the Canadian Pacific agricultural department crop report.

Following the announcement of reduced ocean rates on Canadian Pacific ships on the Atlantic, one of the largest parties ever to leave Toronto at this time of year for the Old Country sailed recently aboard the Duchess of York. There were 275 in the party drawn from all parts of eastern Ontario but mostly from Toronto.

The first cases of roses and shrubs from France for Grand Pre Park, Nova Scotia, arrived there recently. They are from Chatellerault, France, the gift of the mayor of that town. Chatellerault is one of the places in France where the exiled acadians settled after the Grand Pre expulsion.

Four stretches of New Brunswick trout and salmon waters were sold at the Department of Lands and Mines recently for prices totalling $8,850. These leases for a term of 10 years are on the Restigouche, Kedgwick, Matapedia and Big Sevogle Rivers and prices paid are the annual rental charges.

Daylight saving time, commencing in Quebec and Ontario provinces May 1, occasioned little confusion on Canadian Pacific travel. Travellers have nowadays learned that the railways remain on standard time and govern themselves accordingly. The railway announced a number of train time alterations prior to the introduction of daylight saving.

From little Norfolk Island in the South Pacific, one of the smallest units in the British Empire, an excellent sample of beans for exhibition at the World's Grain Exhibition and Conference to be held at Regina July 1933, has just arrived.

The Man who needs Life Insurance most

is the man who cannot get it!

Ask any of the 400,000 men who last year were "turned down" by the life insurance companies when they wanted insurance.

An accident, or a few days of illness often convert a good risk into a rejected applicant.

The policy you can buy to-day may not be obtainable next year.

Wise men are buying all the life insurance they can while they are still insurable.

Three billions of insurance is carried by the Sun Life on the lives of men who refuse to take the chance of finding they are ineligible for insurance when they *need* it *most*.

The time to insure is NOW

SUN LIFE ASSURANCE COMPANY OF CANADA
Head Office: MONTREAL

ANNOUNCING
